Configuring BIG-IP DNS (formerly GTM) v16.1

CODE: LENGTH: PRICE:

F5N_BIG-DNS-I 16 Hours (2 days) kr19,500.00

Description

This course gives networking professionals a functional understanding of the BIG-IP DNS system as it is commonly used. The course covers installation, configuration, and management of the BIG-IP DNS system, and includes a combination of lecture, discussion, and hands-on labs.

Topics covered in this course include: v13 Course Topics BIG-IP initial setup (licensing, provisioning, and network configuration) Overview of the Domain Name System and DNS resolution flow through BIG-IP DNS Configuring DNS listeners Accelerating DNS resolution with DNS Express, DNS cache, and DNS server load balancing Intelligent DNS resolution with wide IPs and wide IP pools Using probes and metrics to assist the intelligent DNS resolution process Intelligent DNS load balancing methods Monitoring intelligent DNS resources Logging GSLB load-balancing decisions Using DNSSEC Integrating iRules in the DNS resolution process Managing BIG-IP DNS sync groups

Objectives

Introducing the BIG-IP System Initially Setting Up the BIG-IP System Configuring the Management Interface Activating the Software License Provisioning Modules and Resources Importing a Device Certificate Specifying BIG-IP Platform Properties Configuring the Network Configuring Network Time Protocol (NTP) Servers Configuring Domain Name System (DNS) Settings Configuring High Availability Options Archiving the BIG-IP Configuration Leveraging F5 Support Resources and Tools v13 COURSE OUTLINE Chapter 1: Setting Up the BIG-IP System BIG-IP System Setup Labs
Understanding the Domain Name System (DNS)
Reviewing the Name Resolution Process
Implementing BIG-IP DNS
Chapter 2: Introducing the Domain Name System (DNS) and BIG-IP DNS Using DNS Resolution Diagnostic Tools
Introducing DNS Resolution with BIG-IP DNS
BIG-IP DNS Resolution Decision Flow
Configuring BIG-IP DNS Listeners
Resolving DNS Queries in the Labs (Lab Zone Records) Load Balancing Queries to a DNS Server Pool
Accelerating DNS Resolution with DNS Cache
Accelerating DNS Resolution with DNS Express
Introducing Wide IPs
Using Other Resolution Methods with BIG-IP DNS
Chapter 3: Accelerating DNS Resolution Integrating BIG-IP DNS into Existing DNS Environments

Introducing Intelligent DNS Resolution Identifying Physical Network Components Identifying Logical Network Components **Collecting Metrics for Intelligent Resolution Configuring Data Centers** Configuring a BIG-IP DNS System as a Server Configuring a BIG-IP LTM System as a Server Establishing iQuery Communication between BIG-IP Systems Configuring a Non-F5 Server **Defining Links and Routers Configuring Wide IP Pools Configuring Wide IPs** Managing Object Status Chapter 4: Implementing Intelligent DNS Resolutions Using the Traffic Management Shell (TMSH) Introducing LDNS Probes and Metrics Types of LDNS Probes Excluding an LDNS from Probing Chapter 5: Using LDNS Probes and Metrics Configuring Probe Metrics Collection Introducing Load Balancing on BIG-IP DNS Using Static Load Balancing Methods Round Robin Ratio Global Availability Static Persist Other Static Load Balancing Methods Using Dynamic Load Balancing Methods **Round Trip Time Completion Rate** CPU Hops Least Connections Packet Rate Kilobytes per Second Other Dynamic Load Balancing Methods Using Quality of Service Load Balancing Persisting DNS Query Responses Configuring GSLB Load Balancing Decision Logs Using Manual Resume Chapter 6: Load Balancing Intelligent DNS Resolution Using Topology Load Balancing **Exploring Monitors Configuring Monitors** Assigning Monitors to Resources Chapter 7: Monitoring Intelligent DNS Resources Monitoring Best Practices **Chapter 8: Advanced BIG-IP DNS Topics** Implementing DNSSEC Setting Limits for Resource Availability Using iRules with Wide IPs Introducing Other Wide IP Types

Audience

This course is intended for system and network administrators responsible for installation, setup, configuration, and administration of BIG-IP DNS systems.

Implementing BIG-IP DNS Sync Groups Chapter 9: Final Configuration Projects Review Questions

Prerequisites

There are no F5-technology-specific prerequisites for this course: However, completing the following before attending would be helpful for students with limited BIG-IP administration and configuration experience: Administering BIG-IP instructor-led course

or

F5 Certified BIG-IP Administrator

The following free web-based courses, although optional, will be very helpful for any student with limited BIG-IP administration and configuration experience. These courses are available at F5 University:

Getting Started with BIG-IP web-based training

Getting Started with BIG-IP DNS web-based training

The following general network technology knowledge and experience are recommended before attending any F5 Global Training Services instructor-led course:

OSI model encapsulation Routing and switching Ethernet and ARP TCP/IP concepts IP addressing and subnetting NAT and private IP addressing Default gateway Network firewalls LAN vs. WAN The following course-specific knowledge and experience is suggested before attending this course: DNS resolution process Experience configuring DNS content and resolution servers DNSSEC Need more information - please go to F5 webpage under "Education"
