Description

Školení je možné absolvovat i online formou "VCL" virtuální školení, více informací [ZDE](#).

Školení Check Point Certified Troubleshooting Administrator (CCTA) poskytuje porozumení konceptum a dovednostem nezbytným k řešení problému, které mohou nastat při správě platformy Check Point. Tento kurz je dvoudenní a je zaměřen pouze na troubleshooting jednotlivých funkcí.

Instruktor doplnuje školení o novinky z verzí R80.40 a R81 v prezentaci. Praktická cvičení jsou ve verzi R80.30.

Cíle

- Understand how to use Check Point resources for support.
- Understand how to perform packet captures using tcmdump and FW Monitor command tools.
- Understand the basic process of kernel debugging, and how debug commands are structured.
- Recognize how to use various Linux commands for troubleshooting system issues.
- Recognize communication issues that may occur between SmartConsole and the SMS and how to resolve them.
- Understand how to troubleshoot SmartConsole login and authentication issues.
- Understand how to prevent and resolve licensing and contract issues.
- Understand how to troubleshoot issues that may occur during policy installation.
- Understand communication issues that may occur when collecting logs and how to resolve them.
- Recall various tools to use when analyzing issues with logs.
- Understand how to restore interrupted communications during heavy logging.
- Understand how NAT works and how to troubleshoot issues.
- Understand Client Side and Server Side NAT.
- Understand how the Access Control Policy functions and how the access control applications work together.
- Understand how to troubleshoot issues that may occur with Application Control and URL Filtering. • Understand how the HTTPS Inspection process works and how to resolve issues that may occur during the process.
- Understand how to troubleshoot Content Awareness issues.
- Recognize how to troubleshoot VPN-related issues.
- Understand how to monitor cluster status and work with critical devices.
- Recognize how to troubleshoot State Synchronization.
- Understand how to troubleshoot communication issues between Identity Sources and Security Gateways.
- Understand how to troubleshoot and debug issues with internal Identity Awareness processes.

Určeno pro

Administrátory a zkušenější uživatele, kteří se potřebují dovedet možnosti řešení problému při správě platformy Check Point.

Vstupní znalosti

- CCSA training/certification (not a requirement, but applicants for the training should have intermediate knowledge of Check Point). CCSE training/certification is a plus.
- Deeper knowledge of Linux and TCP/IP.

Program

- An Introduction to Troubleshooting
- SmartConsole and Policy Management Troubleshooting
- Monitoring Logging Activity
- Troubleshooting Issues with NAT
- Understanding the Unified Access Control Policy
- Basic VPN Troubleshooting
- Monitoring ClusterXL Connections

Course Topics • Understanding Identity Awareness

Lab Exercises

- Monitoring Security Gateway Traffic
- Troubleshooting Issues with SmartConsole
- Troubleshooting Log Connectivity Issues
- Investigating Log Connectivity Issues
- Investigating NAT Issues
- Troubleshooting General Traffic Issues
- Evaluating HTTP and HTTPS Traffic Issues
- Troubleshooting Site-to-Site VPN Issues
- Troubleshooting Clustering Issues
- Troubleshooting Identity Awareness
- Configuring and Testing Identity Collector
