Administering BIG-IP v16.1

CODE:	LENGTH:	PRICE:
F5N_BIG-OP-ADMIN	16 Hours (2 days)	kr19,500.00

Description

This course gives network administrators, network operators, and network engineers a functional understanding of the BIG-IP system as it is commonly deployed in an application delivery network. The course introduces students to the BIG-IP system, its configuration objects, how it processes traffic, and how typical administrative and operational activities are performed. The course includes lecture, hands-on labs, interactive demonstrations, and discussions.

Topics covered in this course include: v13 Course Topics

- Getting started with the BIG-IP system
- Traffic processing with BIG-IP Local Traffic Manager (LTM)
- Using the TMSH (TMOS Shell) command line interface
- Using NATs and SNATs
- Monitoring application health and managing object status
- Modifying traffic behavior with profiles, including SSL offload and re-encryption
- Modifying traffic behavior with persistence, including source address affinity and cookie persistence
- Troubleshooting the BIG-IP system, including logging (local, high-speed, and legacy remote logging), and using tcpdump
- User roles and administrative partitions
- vCMP concepts
- Customizing application delivery with iRules

Objectives

- Introducing the BIG-IP System
- Initially Setting Up the BIG-IP System
- Archiving the BIG-IP Configuration
- v13 COURSE OUTLINE Chapter 1: Setting Up the BIG-IP System** Leveraging F5 Support Resources and Tools
 - Identifying BIG-IP Traffic Processing Objects
 - Network Packet Flow
 - Configuring Virtual Servers and Pools
 - Load Balancing Traffic
 - Viewing Module Statistics and Logs
 - Using the Traffic Management Shell (TMSH)
 - Understanding the TMSH Hierarchical Structure
 - Navigating the TMSH Hierarchy
 - Managing BIG-IP Configuration State and Files
 - BIG-IP System Configuration State
 - Loading and Saving the System Configuration
 - Shutting Down and Restarting the BIG-IP System
- Chapter 2: Traffic Processing Building Blocks** Saving and Replicating Configuration Data (UCS and SCF)
 - Address Translation on the BIG-IP System
 - Mapping IP Addresses with NAT
 - Solving Routing Issues with SNATs
 - Configuring SNAT Auto Map on a Virtual Server
- Chapter 3: Using NATs and SNATs** Monitoring for and Mitigating Port Exhaustion **Chapter 4: Monitoring Application Health**
 - Introducing Monitors
 - Types of Monitors
 - Monitor Interval and Timeout Settings
 - Configuring Monitors
 - Assigning Monitors to Resources
 - Managing Pool, Pool Member, and Node Status
 - Using the Network Map
- Chapter 5: Modifying Traffic Behavior with Profiles**

Introducing Profiles
 Understanding Profile Types and Dependencies
 Configuring and Assigning Profiles
 Understanding the Need for Persistence
 Introducing Source Address Affinity Persistence
 Introducing Cookie Persistence
 Introducing SSL Offload and SSL Re-Encryption
 Managing Object State

Chapter 6: Administering the BIG-IP System

Configuring Logging
 Legacy Remote Logging
 Introducing High Speed Logging (HSL)
 High-Speed Logging Filters
 HSL Configuration Objects
 Configuring High Speed Logging
 Using TCPDUMP on the BIG-IP System
 Leveraging the BIG-IP iHealth System
 Viewing BIG-IP System Statistics
 Defining User Roles and Administrative Partitions

Chapter 7: Customizing Application Delivery with iRules

Leveraging vCMP
 Identifying iRules Components
 Triggering iRules with Events
 Leveraging the iRules Ecosystem on DevCentral

Audience

This course is intended for network administrators, operators, and engineers responsible for managing the normal day-to-day operation and administration of a BIG-IP application delivery network. This course presents the prerequisite knowledge for many other of F5's BIG-IP instructor-led training courses.

Prerequisites

There are no required F5 prerequisites for this course. The following free web-based training courses, although optional, will be very helpful for any student with limited BIG-IP administration and configuration experience. These courses are available at F5 University:

Getting Started with BIG-IP web-based training
 Getting Started with BIG-IP Local Traffic Manager (LTM) web-based training

The following general network technology knowledge and experience are recommended before attending any F5 Global Training Services instructor-led course:

OSI model encapsulation
 Routing and switching
 Ethernet and ARP
 TCP/IP concepts
 IP addressing and subnetting
 NAT and private IP addressing
 Default gateway
 Network firewalls
 LAN vs. WAN

More information - F5 Webpage under "Education"

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
26 Aug 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr19,500.00
21 Oct 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr19,500.00
09 Dec 2024	Virtual Classroom (CET / UTC +1)	CET	English	Instructor Led Online		kr19,500.00
