- Process items
- Configuring SharePoint
- Configure SharePoint targets

- Define SharePoint archiving
- Process items
- Troubleshooting the Implementation
- Review the installation logs
- Outline common implementation issues
- Use common troubleshooting tools
- Use common troubleshooting resources
- Validating the environment
- Test archiving and access
- Complete all documentation
- Outline a backup schedule for Enterprise Vault
- Installing Enterprise Vault in a Domino environment
- Describe how Domino archiving works in order to understand the prerequisites required
- Describe additional prerequisites required for
- Domino archiving
- Configuring Domino Mailbox Archiving
- Configure Domino targets
- Define when and how archiving occurs
- Process Domino mailboxes
- Configuring Domino Clients
- Validate user access
- Configure access for Domino clients
- Configuring Domino Journal Archiving
- Configure Domino Journal archiving
- Process Domino Journal items
- Introduction to designing an Enterprise Vault deployment
- Describe the main steps to deploy Enterprise Vault
- Describe the main considerations when designing an
- Enterprise Vault deploymentDescribe Enterprise Vault designs for common deployment scenarios
- Preparing the environment for installing Enterprise Vault
- Describe the installation prerequisites for the Enterprise Vault server
- Describe the additional installation prerequisites required for Exchange archiving
- Describe the additional installation prerequisites required for file system archiving Describe the additional installation prerequisites required for SharePoint archiving
- Use the Deployment Scanner to confirm that all the prerequisites have been installed and configured correctly
- Installing Enterprise Vault
- Use the Enterprise Vault install launcher to install Enterprise Vault
- Complete post-installation tasks
- Uninstall or reinstall Enterprise Vault
- Configuring the Enterprise Vault
- Run the Enterprise Vault configuration wizard
- Configure site settings to meet specific requirement
- Deploy roles-based access (RBA) for administration access
- Configure monitoring and reporting
- Configuring Indexing and Storage
- Describe the steps required to configure indexing
- Create retention categories to meet defined requirements Create storage to meet defined requirements
- Configuring Exchange Mailbox Archiving
- Configure Exchange targets
- Define how and when archiving occurs
- Process Exchange mailboxes
- Configuring Exchange Clients – Part I
- Configure the Outlook 2010 client
- Configure OWA
