IBM Watson Studio and IBM Watson Machine Learning for IBM Cloud Pak for Data (V3.0.x) eLearning

CODE:	LENGTH:	PRICE:
6X338G	6 Hours	$150.00

Description

This course goes through the stages of a data science project from importing data to deployment, using services in Watson Studio and Watson Machine Learning for Cloud Pak for Data.

Objectives

• Introduction to Watson Studio and Watson Machine Learning for Cloud Pak for Data
• Work with analytics projects
• Import data
• Prepare data for modeling with Data Refinery
• Automate building supervised models with AutoAI experiment
• Work with notebooks
• Deploy Watson Machine Learning models

Audience

Clients who want to use the data science capabilities on Cloud Pak for Data or those who want to learn more about data science

Prerequisites

Knowledge of your business requirements

Programme

Introduction to Watson Studio and Watson Machine Learning for Cloud Pak for Data
• Describe the IBM Cloud Pak for Data platform and AI
• Describe the four rungs in the ladder to AI
• Describe the personas on the platform
• Describe how to collaborate on the platform
• Describe the CRISP-DM methodology

Work with analytics projects
• Describe analytics projects
• Create analytics projects
• Leverage industry accelerators

Import data
• Identify key concepts in working with data
• Describe correct column types
• Add local files to the project
• Created connections
• Add connected data sets to the project

Prepare data for modeling with Data Refinery
• Identify three tasks in preparing data for modeling
• Describe the capabilities of Data Refinery
• Describe steps, flows, and jobs
• Join data
• Profile data
• Visualize data

Automate building supervised models with AutoAI experiment
• Describe when AutoAI experiment can be used
• Describe the importance of column types
• Describe how the best model is identified
• Describe pipelines
• Save AutoAI experiment pipelines to the project
• Explain evaluation measures

Work with notebooks
• Work with notebooks
• Load data into a notebook
• Prepare data for modeling
• Build machine learning models
• Save machine learning models to the project

Deploy Watson Machine Learning models
• Identify Watson Machine Learning models
• Describe deployment spaces
• Create deployment spaces
• Describe model deployment options
• Create deployments
• Test deployments

Session Dates

On request. Please Contact Us

Additional Information

This training is also available as onsite training. Please contact us to find out more.
