ILE Foundation for IBM i

CÓDIGO:	**DURACIÓN:**	**Precio:**
OL4BG	8 Hours (1 dia)	€650.00

Description

This course teaches Integrated Language Environment (ILE) skills and techniques to programmers who can already write RPG IV programs.

This class offers a comprehensive discussion of the Integrated Language Environment. This class is designed to enable an experienced programmer to develop and maintain procedural and modular function of an advanced level using the latest features and techniques available in the IBM i.

Objetivos

- Develop ILE modular objects and package them in service programs
- Explain the purpose on Bind Directories
- Explain the purpose of ILE activation groups

Público

This intermediate course is designed for programmers who want to learn to use modular programming techniques using the IBM i. Previous programming experience using RPG IV is desired before enrolling in this course. The student should have attended *IBM i Technical Introduction (OL4AG)*.

This class is not designed for RPG IV programmers specifically, but the units and exercises use RPG IV Modules to teach the material.

Previous techniques and the maintenance of programs written using legacy techniques are not covered in the classroom.

Requisitos Previos

You must have attended:

- *Introduction to IBM i for New Users (OE98G)*
- *IBM i Technical Introduction (OL4AG)*

or have equivalent experience You should be able to:

- Use a Windows-based PC
- Run PC applications using menus, icons, tool bars, **and** so forth

Programa

- Unit 1 - Welcome and administration
- Unit 2 - An introduction to the Integrated Language Environment
  - Lab exercise 1 - Bind by copy
  - Lab exercise 2 - Bind by reference

- Unit 3 - Advanced ILE topics
  - Lab exercise 3 - Enhancing a NOMAIN service program
  - Lab exercise 4 - Using binding directories and binder language

Fechas Programadas
