VMW_NSXTO64 40 Hours (5 días) €2,060.00

Description

This five-day, hands-on training course provides you with the advanced knowledge, skills, and tools to achieve competence in operating and troubleshooting the VMware NSX® 6.4 environment. In this course, you are introduced to several operational, management, and troubleshooting tools. You will be presented with various types of technical problems, which you will identify, analyze, and solve through a systematic process.

This course is also available in an On Demand format. For more information, select this link: VMware NSX: Troubleshooting and Operations [V6.4] - On Demand.

Product Alignment

- NSX 6.4
- VMware vRealize® Network Insight™ 3.6
- VMware vRealize® Log Insight™ 4.5

Objetivos

By the end of the course, you should be able to meet the following objectives:

- · Establish and apply a structured troubleshooting approach and methodology
- Explain the native NSX tools, VMware vRealize® Suite tools, and partner tools that are useful for monitoring, troubleshooting, and operations
- · Explain the NSX infrastructure components and the communications between them
- · Identify, analyze, and troubleshoot problems related to the NSX management, control, and data planes
- Identify, analyze and troubleshoot problems related to NSX logical switching, logical routing, and VMware NSX® Edge™ services
- · Identify, analyze, and troubleshoot network security problems related to the NSX distributed firewall and the NSX Edge firewall

Certifications

This course prepares you for the following certification:

VMware Certified Advanced Professional 6 – Network Virtualization Deployment (VCAP6-NV Deploy)

Público

Network professionals who work with enterprise networks and VMware Sphere® 6.x

Requisitos Previos

- · Knowledge and working experience of computer networking, including:
 - o Switching and routing technologies (L2-3)
