Microsoft Azure Architect: Fast Track

CODE:	LENGTH:	PRICE:
MCS_AZ30X	40 Hours (5 days)	kr35,000.00

Description

This packaged set aligned to Azure Exams: Azure Architect-Technologies and Azure Solutions Architect-Design contains the following:

- Course AZ-300T01: Deploying and Configuring Infrastructure
- Course AZ-300T02: Implementing Workloads and Security
- Course AZ-300T03: Understanding Cloud Architect Technology Solutions
- Course AZ-300T04: Creating and Deploying Apps
- Course AZ-300T05: Implementing Authentication and Secure Data
- Course AZ-300T06: Developing for the Cloud
- Course AZ-301T01: Designing for Identity and Security
- Course AZ-301T02: Designing a Data Platform Solution
- Course AZ-301T03: Design for Deployment, Migration, and Integration
- Course AZ-301T04: Designing an Infrastructure Strategy

This packaged set provides students with the key knowledge to help prepare for Exam AZ-300 and Exam AZ-301.

Audience

Successful Cloud Solutions Architects begin this role with practical experience with operating systems, virtualization, cloud infrastructure, storage structures, billing, and networking.

Programme

Deploying and Configuring Infrastructure

- Managing Azure Subscriptions and Resources
- Implementing and Managing Storage
- Deploying and Managing Virtual Machines (VMs)
- Configuring and Managing Virtual Networks
- Managing Identities
- Implementing Workloads and Security
- Evaluating and Performing Server Migration to Azure
- Implementing and Managing Application Services
- Implementing Advanced Virtual Networking
- Securing Identities

Understanding Cloud Architect Technology Solutions

- Selecting Compute and Storage Solutions
- Hybrid Networking
- Measuring Throughput and Structure of Data Access
- Creating and Deploying Apps
- Creating Web Applications using PaaS
- Creating Apps and Services Running on Service Fabric
- Using Azure Kubernetes Service

Developing for the Cloud

- Developing Long-Running Tasks and Distributed Transactions
- Configuring a Message-Based Integration Architecture

Implementing Authentication and Secure Data

- Implementing Authentication
- Implementing Secure Data
- Developing for Asynchronous Processing
- Developing for Autoscaling
- Developing Azure Cognitive Services Solutions

Designing a Data Platform Solution

- Designing for Identity and Security
- Managing Security & Identity for Azure Solutions
- Integrating SaaS Services Available on the Azure Platform
- Backing Azure Solutions with Azure Storage
- Comparing Database Options in Azure

Designing for Deployment, Migration, and Integration

- Deploying Resources with Azure Resource Manager
- Creating Managed Server Applications in Azure
- Authoring Serverless Applications in Azure
- Monitoring & Automating Azure Solutions
- Designing an Infrastructure Strategy
- Application Architecture Patterns in Azure
- Building Azure IaaS-Based Server Applications (ADSK)
- Networking Azure Application Components
- Integrating Azure Solution Components Using Messaging Services
