VMware Tanzu Mission Control: Management and Operations 2020

CÓDIGO:

VMW_TCMCO2020

DURACIÓN:

8 Hours (1 día)

Precio:

A consultar

Description

During this one-day course, you focus on using VMware Tanzu™ Mission Control™ to provision and manage Kubernetes clusters. The course covers how to manage on-premise and cloud-based Kubernetes clusters and how to apply access, image registry, and network policies to clusters.

Product Alignment

- VMware Tanzu Mission Control

Objetivos

By the end of the course, you should be able to meet the following objectives:

- Describe the Tanzu Mission Control architecture
- Configure user and group access
- Create and manage Kubernetes clusters
- Create access, image registry, and network policies
- Monitor cluster health and perform cluster inspections

Público

VI administrators or application owners who are responsible for deploying and managing Kubernetes clusters and workloads

Requisitos Previos

- Working knowledge of Kubernetes.
- Working knowledge of Amazon Web Services (AWS) is beneficial if you intend to deploy Kubernetes clusters on AWS.
