## IBM TechU DevOps for IBM Z

**Kód:** TU00026G  
**DÉLKA:** 5.04 Hours  
**CENA:** Kč bez DPH 3,900.00

### Description

This Learning path covers discussions and labs on bringing DevOps tools and practices to mainframe application development. Objectives:

- Understand how IBM zUnit can be used to create and run unit tests on COBOL/Db2 batch programs
- Understand how a modern IDE like IDz can be used to work with z/OS and z/OS applications
- Understand and learn how to embrace modern programming languages like Java, Node.js, Python and Go on z/OS
- Learn how to use ADDI and Wazi Analyze to understand traditional z/OS applications and start your z/OS modernization journey.
- Understand the end-to-end process that enables CI/CD pipelines on the mainframe
- Understand the coming changes to IBM z/OS Cloud Broker which will soon be built upon Ansible Automation
- Understand how to use IBM Z VTP to create and perform integration testing on a COBOL/CICS/Db2 transaction

### Cíle

- Understand how IBM zUnit can be used to create and run unit tests on COBOL/Db2 batch programs
- Understand how a modern IDE like IDz can be used to work with z/OS and z/OS applications
- Understand and learn how to embrace modern programming languages like Java, Node.js, Python and Go on z/OS
- Learn how to use ADDI and Wazi Analyze to understand traditional z/OS applications and start your z/OS modernization journey.
- Understand the end-to-end process that enables CI/CD pipelines on the mainframe
- Understand the coming changes to IBM z/OS Cloud Broker which will soon be built upon Ansible Automation
- Understand how to use IBM Z VTP to create and perform integration testing on a COBOL/CICS/Db2 transaction

### Určeno pro

IBM Z clients and Business Partners - Architects, Systems Administrators, Systems Developers interested in DevOps on IBM Z

### Program

Are you using the most modern development environment for z/OS? Don't get left behind! Modernize your business critical application on z/OS using our latest programming languages Your application modernization journey starts with Discovery and Analysis with ADDI -and- Wazi Analyze DevOps: It's a sprint and a marathon - keep up! IBM z/OS Cloud Broker Is Now Powered by Ansible Automations
