Git for Operations Class

CODE:	LENGTH:	PRICE:
OTH_GIT	8 Hours (1 day)	kr 5,100.00

Description

Is your organization starting on a DevOps journey, going from traditional Development and Operations to a united setup?
Is source control, Git, Pull Requests new and unused skills for you?
What is a Repository, a pull request or a pipeline?
In this 1 day, two module class we will help you understand and with hands on labs in Git and Azure DevOps make you prepared for the future.
This class is matched with our 2 day Ansible Basic Training which is part of the DevOps wheel

Objectives

Hands on labs that will take you through Git as a Source Control tool and Azure DevOps as Repository, Task management and Pipelines system
 Git course:
 Going from installing git, initializing a repo, adding files, committing, branching, logging and much more
Azure DevOps:
Creating Repositories, tasks, creating and approving Pull Requests, creating and running Build and Release Pipelines
