## VMware Carbon Black Portfolio: Configure and Manage

<b>Kod:</b>	<b>Czas trwania:</b>	<b>Cena netto:</b>
VMW_CBCM	40 Hours (5 days)	zł9,300.00

### Description

This 5-day course teaches you how to install, configure, and manage the VMware Carbon Black Portfolio suite of products, which include:

- VMware Carbon Black App Control Administrator • VMware Carbon Black EDR Administrator
- VMware Carbon Black Cloud Endpoint Standard • VMware Carbon Black Cloud Audit and Remediation
- VMware Carbon Black Cloud Enterprise EDR

You learn how to use the capabilities of the products according to the organization's security posture and organizational policies. This course provides an in-depth, technical understanding of the Carbon Black Portfolio through comprehensive coursework, hands-on labs, and scenario-based exercises.

### Cel szkolenia

By the end of the course, you should be able to meet the following objectives:

- Describe the components and capabilities of Carbon Black App Control
- Manage and configure the Carbon Black App Control server based on organizational requirements
- Create policies to control enforcement levels and agent functionality
- Implement rules to support the organization's security posture
- Use the Carbon Black App Control tools to understand agent and server data
- Describe the components and capabilities of the Carbon Black EDR server
- Identify the architecture and data flows for Carbon Black EDR communication
- Describe the Carbon Black EDR server installation process
- Manage and configure the Carbon Black EDR server based on organizational requirements
- Perform searches across process and binary information
- Implement threat intelligence feeds and create watchlists for automated notifications
- Describe the different response capabilities available from the Carbon Black EDR server
- Use investigations to correlate data between multiple processes
- Describe the components and capabilities of Carbon Black Cloud Endpoint Standard
- Identify the architecture and data flows for VMware Carbon Black Cloud products
- Perform searches across endpoint data to discover suspicious behavior
- Manage the Carbon Black Cloud Endpoint Standard rules based on organizational requirements
- Configure rules to address common threats
- Evaluate the impact of rules on endpoints
- Process and respond to alerts
- Describe the different response capabilities available from VMware Carbon Black Cloud
- Describe the components and capabilities of Carbon Black Cloud Enterprise EDR
- Perform searches across endpoint data to discover suspicious behavior
- Manage watchlists to augment the functionality of Carbon Black Cloud Enterprise EDR
- Create custom watchlists to detect suspicious activity in your environment
- Describe the process for responding to alerts in Carbon Black Cloud Enterprise EDR
- Discover malicious activity within Carbon Black Cloud Enterprise EDR
- Describe the different response capabilities available from VMware Carbon Black Cloud
- Describe the components and capabilities of Carbon Black Cloud Audit and Remediation
- Describe the use case and functionality of recommended queries
- Achieve a basic knowledge of SQL
- Describe the elements of a SQL query
- Evaluate the filtering options for queries
- Perform basic SQL queries on endpoints
- Describe the different response capabilities available from VMware Carbon Black Cloud

## **Uczestnicy**

System administrators and security operations personnel (including analysts and managers).

## **Wymagania wstępne**

System administration experience on Microsoft Windows or Linux operating systems.

## **Terminy**

Na żądanie. Prosimy o kontakt

## **Dodatkowe informacje**
