Description

This five-day, hands-on training course provides you with the knowledge, skills, and tools to achieve competency in configuring, operating, and troubleshooting VMware NSX-T Data Center for intrinsic security. In this course, you are introduced to all the security features in NSX-T Data Center, including distributed and gateway firewall, Intrusion Detection and Prevention (IDS/IPS), VMware NSX® Intelligence, and Network Detection and Response (NDR).

In addition, you are presented with common configuration issues and given a methodology to resolve them.

Cel szkolenia

By the end of the course, you should be able to meet the following objectives:

- Define information security related concepts
- Explain different types of firewalls and their use cases
- Describe the operation of Intrusion Detection and Intrusion Prevention Systems
- Describe the VMware intrinsic security portfolio
- Implement Zero-Trust Security using VMware NSX® segmentation
- Configure User and Role Management
- Configure and troubleshoot Distributed Firewall, Identity Firewall, and time-based policies
- Configure and troubleshoot Gateway Security
- Use VMware vRealize Log Insight, VMware vRealizeNetwork Insight, and NSX Intelligence to operate NSX firewalls and generate security recommendations
- Explain security best practices related to grouping, tagging, and rule configuration
- Describe North-South and East-West service insertion
- Describe Endpoint Protection
- Configure and troubleshoot Distributed IDS/IPS
- Describe the capabilities of Network Detection and Response

Uczestnicy

Experienced security administrators.

Wymagania wstępne

You should also have the following understanding or knowledge:

- Good understanding of TCP/IP services and protocols
- Knowledge and working experience of network security, including:
 - L2-L7 Firewalling
 - Intrusion Detection and Prevention Systems
- Knowledge and working experience of VMware vSphere environments and KVM-based environments

The VMware Certified Technical Associate - Network Virtualization is recommended.
