FCP-FortiManager & FortiAnalyzer Analyst

CODE:	**LÄNGE:**	**PREIS:**
FNT_NSE5BUNDLE	24 Hours (3 Tage)	€2,160.00

Description

In this course, you will learn the fundamentals of using FortiAnalyzer for
centralized logging and reporting. You will learn how to configure and deploy
FortiAnalyzer, and identify threats and attack patterns through logging, analysis, and reporting. Finally, you will examine the
management of events, incidents, playbooks, and some helpful troubleshooting techniques.

Lernziel

After completing this course, you will be able to:
l Describe key features and concepts of FortiAnalyzer
l Deploy an appropriate architecture
l Use administrative access controls
l Monitor administrative events and tasks
l Configure high availability
l Understand HA synchronization and load balancing
l Upgrade the firmware of an HA cluster
l Verify the normal operation of an HA cluster
l Manage ADOMs
l Manage RAID
l Register supported devices
l Troubleshoot communication issues
l Manage disk quota
l Manage registered devices
l Protect log information
l View, search, manage, and troubleshoot logs
l Monitor and manage events
l Manage and customize event handlers
l Create and manage incidents
l Explore tools used for threat hunting
l Create, run, and troubleshoot playbooks
l Import and export playbooks
l Generate and customize reports
l Customize charts and datasets
l Manage and troubleshoot reports
l Describe the key features and capabilities of
FortiManager
l Deploy administrative domains (ADOMs) to support
multiple customers on a single FortiManager
l Restrict concurrent ADOM access by using workspaces
and workflow mode
l Use provisioning templates for device-level changes
across many devices
l Identify the synchronization states and manage the
revision history of managed devices
l Manage firewall policies across multiple FortiGate
devices using policy packages with shared and dynamic
objects
l Deploy policies and objects from the global ADOM to
multiple ADOMs
l Understand the Fortinet Security Fabric with
FortiManager

l Describe high-availability (HA), backup, and recovery
options for FortiManager
l Manage the firmware of supported devices centrally
l Offer a local FortiGuard distribution server to your Fortinet
devices
l Diagnose and troubleshoot import and installation issues

Zielgruppe

Anyone who is responsible for the day-to-day management of FortiAnalyzer devices and FortiGate security
information.
