Check Point Certified Security Administrator R81.X

Kód:

CKT_CCSA_R81.X

DÉLKA:

24 Hours (3 DENNÍ)

CENA:

Kč bez DPH 33,500.00

Description

Tento třídenní základní kurz obsahuje vše, co potřebujete ke spuštění, konfiguraci a správě každodenního provozu bezpečnostní brány Check Point a Management serveru R81.10 na operačním systému GAiA.

Naučíte se s námi základní koncepty a získáte znalosti potřebné pro správu bezpečnostního řešení Check Point.

Cíle

• Know how to perform periodic administrator tasks.
• Describe the basic functions of the Gaia operating system.
• Recognize SmartConsole features, functions, and tools.
• Understand how SmartConsole is used by administrators to give user access.
• Learn how Check Point security solutions and products work and how they protect networks.
• Understand licensing and contract requirements for Check Point security products.
• Describe the essential elements of a Security Policy.
• Understand the Check Point policy layer concept.
• Understand how to enable the Application Control and URL Filtering software.
• Blades to block access to various applications.
• Describe how to configure manual and automatic NAT.
• Identify tools designed to monitor data, determine threats and recognize opportunities for performance improvements.
• Describe different Check Point Threat Prevention solutions fornetwork attacks.
• Articulate how the Intrusion Prevention System is configured, maintained and tuned.
• Understand the Infinity Threat Prevention system.
• Knowledge about Check Point's IoT Protect.

Určeno pro

Technical professionals who support, install deploy or administer Check Point products.

Vstupní znalosti

Security Administration Course or CCSA certification (R80 or higher)
Windows Server, UNIX and networking skills and TCP/IP experience
Certificate management and system administration

Program

• Configure the Security Management Server.
• Use the WebUI to run the First Time Wizard.
• Install the Smart Console.
• Install the Alpha Gateway using the network detailed in the course topology.
• Demonstrate how the Security Management Server and Gateway communicate.
• Test SIC Status.
• Create multiple administrators and apply different roles and permissions for simultaneous administration.
• Validate existing licenses for products installed on the network.
• Create and configure host, network and group objects.
• Create a simplified Security Policy.
• Demonstrate how to use Security Zones in policy.
• Demonstrate how to share a layer between Security Polices.

• Configure Network Address Translation for server and network objects.
• Enable Identity Awareness.
• Deploy user access roles for more granular control of the security Policy.
• Generate network Traffic and use traffic visibility tools to monitor the data.
• Use SmartConsole and SmartView Monitor to view status, alerts, and block suspicious traffic.
