# Citrix Gateway 12.x

CODE:	LENGTH:	PRICE:
CTX_CNS-221	2 day(s)	kr18,000.00

## Description

Designed for students with previous NetScaler experience, yet no NetScaler Gateway or Unified Gateway experience, this course is best suited for individuals who will be deploying or managing NetScaler Gateway, or Unified Gateway environments. Learn the skills required to configure and manage NetScaler Gateway and Unified Gateway features, including how to implement Gateway components including NetScaler Gateway and Unified Gateway.

At the end of the course, students will be able to configure their NetScaler environments to address remote access requirements for Apps and Desktops.

***NB: This course is also a part of the Citrix NetScaler Essentials and Unified Gateway (CNS-222) course.***

## Objectives

- Configure Authentication and Authorization
- Define End User Access and Experience
- Integrate NetScaler Gateway with XenApp and XenDesktop
- Integrate Unified Gateway with additional resources
- Employ recommended tools and techniques to troubleshoot common NetScaler Gateway network and connectivity issues

## Audience

Students interested in learning how to implement and manage NetScaler Gateway and Unified Gateway features using leading practices.

Specifically:

- Administrators
- Implementers / Engineers
- Architects

## Prerequisites

- CNS-220 Citrix NetScaler Essentials and Traffic Management

OR

- CNS-205 Citrix NetScaler 11.0 Essentials and Networking

This course is based on version 11 of the Citrix NetScaler product, but the skills and fundamental concepts learned are common to earlier product versions.

Citrix also recommends gaining a basic understanding of the following concepts and technologies before attending the class:

- Basic Networking
- Windows and Linux Server administration
- Experience with Citrix virtualization technologies, such as XenDesktop and XenApp
- Experience with Microsoft SQL Server or enterprise database servers

- Experience with Active Directory and Group Policy
- Basic understanding of Microsoft Remote Desktop Services
- Basic understanding of VPN concepts, including SSL encryption and certificates

## Programme

### Unified Gateway

- Understand the challenges of remote access
- Understand the Unified Gateway feature and its role for application delivery
- Configure Unified Gateway
- Understand the challenges of remote access
- Understand the Unified Gateway feature and its role for application delivery

### AppExpert Expressions and Policies

- Identify policy expression structure and components of AppExpert
- Distinguish between classic and default policies
- Explain the types of policies available with NetScaler Gateway
- Describe policy bind points

### Authentication and Authorization

- Understand Authentication to establish identity
- Understand Authorization to provide access to resources
- Customize multi-factor authentication
- Deploy Authentication and Authorization policies

### Managing Client Connections

- Configure NetScaler Gateway plug-in with Citrix Receiver to establish VPN
- Configure the access level and which applications users are allowed to access in the secure network
- Configure pre-authentication policies and profiles to check for client-side security before end users are authenticated
- Deploy NetScaler Gateway to allow end-user connections, including logon options
- Explain how endpoint analysis is used to verify that the end-user device meets your requirements before allowing it to connect to your network or remain connected after end users log on

### Integrating NetScaler with XenApp and XenDesktop

- Understand NetScaler Gateway Integration with XenApp/XenDesktop
- Integrate with Web Interface and StoreFront
- Explain WebFront
- Enable Clientless Access and Receiver for ICA Proxy
- Utilize Smart Control
- Configure Smart Access

### Unified Gateway

- Describe AppFlow Functionality
- Discuss Components of NetScaler Insight
- Configure NetScaler Insight
- Explain NetScaler Insight Application Performance
- Generate Performance Reports
