VMware vRealize Operations: Install, Configure, Manage [v8]

Kod:	Czas trwania:	Cena netto:
VMW_VROPSICM8	40 Hours (5 days)	zł8,700.00

Description

This five-day course includes instruction on advanced capabilities, including customization and management, and explains the architecture of VMware vRealize and different ways of deploying vRealize operations. This course explains certificates, capacity concepts, and workload optimization with real-world use cases. This course covers troubleshooting using dashboards and how-to managing configurations. This course also covers management packs such as those for or in the SDDC Management Health solution, VMware vRealize Service Discovery Management Pack, and VMware vRealize Orchestrator.

In general, this course explains how to use and configure most of the new features and enhancements in version 8.0.

Cel szkolenia

By the end of the course, you should be able to meet the following objectives:
• Identify features and benefits of vRealize Operations
• Deploy vRealize Operations
• Use interface features to assess and troubleshoot operational issues
• Recognize how to use vRealize Operations components to build scalability and availability
• Recognize effective ways to optimize performance, capacity, and cost in data centers
• Troubleshoot and manage issues and configurations using alerts and dashboards
• Use Telegraf to monitor operating systems and applications
• Create policies to meet the operational needs of your environment
• Create custom alert definitions, reports, and views
• Configure widgets for dashboards
• Configure super metrics
• Set up users and user groups for controlled access to your environment
• Extend the capabilities of vRealize Operations by adding management packs, solutions, and self-monitoring.

Uczestnicy

Experienced system administrators, system integrators, and consultants responsible for designing, implementing, and customizing vRealize Operations.

Wymagania wstępne

This class requires system administration experience with VMware vSphere® deployments or completion of one of the following courses:
• VMware vSphere: Install, Configure, Manage [V6.7]
• VMware vSphere: Optimize and Scale [V6.7]
