Configuring & Monitoring NetApp E-Series Storage Systems

CODE:	LENGTH:	PRICE:
NEP_ES-SS-CM	32 Hours (4 days)	€3,800.00

Description

In this course, you learn how to recommend configurations based on a pre-deployment assessment for a new NetApp E-Series or EF-Series storage system. In the deployment phase, you use both the NetApp SANtricity® storage management and system management software to create the configuration, perform administrative tasks, and employ data protection features. During post-deployment, you use SANtricity system management software to collect storage system information for trend analysis, troubleshooting, performance monitoring, and tuning.

Objectives

This course focuses on enabling you to do the following:

- Identify and use administrative and support tools for E-Series storage systems
- Install SANtricity Storage Manager software on a host platform
- Recommend and create logical configurations on E-Series storage systems
- Manage volume group and dynamic disk pools using SANtricity System Manager
- Perform routine E-Series administrative tasks using SANtricity System Manager
- Configure and administer E-Series features such as SANtricity Snapshot image, volume copy, and mirroring technologies
- Collect E-Series storage system information such as the event log, profile, and support bundle

Audience

This course is designed for Professional Services workers who are NetApp employees, NetApp partners, or NetApp customers.

Prerequisites

Basic Windows administrative experience plus technical Overview of NetApp E-Series Storage Systems

Programme

	E-Series and EF-Series storage products
	SANtricity management interfaces
	SANtricity storage manager
	SANtricity unified manager
Module 1: Introduction to E-Series and EF-Series Storage	System manager overview
	Configuration and I/O Operations
	Cache and battery operation
	Data assurance
	Media scan
Module 2: E-Series and EF-Series Functionality	Drive security
	Host-Side configuration concepts
	Disk-side configuration concepts
	Pool and volume group configuration concepts
	Initial setup steps
Module 3: Configuration Concepts and Initial Setup	Additional setup steps
	Volume groups
	Creating volume groups and volumes
	System administration tasks
Module 4: Volume Group Administration	Managing volume group disks
	Module 5: Pools Administration

Pools						
Creating unsecured disk pools and volumes						
Creating secure pools						
System administration tasks					SSD Cache overview	
Managing disk pool disks					SSD Cache administration	
		Module 6: SSD Cache Administration				
		The SANtricity Snapshot Feature				
		Snapshot administration				
		Snapshot volume operational sequences				
		Snapshot volume administration				
Module 7: Snapshot Administration		Snapshot consistency group administration		Module 8: Copy Volume Function		
				Mirroring technology		
				Synchronous mirroring		
				Synchronous mirroring administration		
				Asynchronous mirroring		
				Asynchronous mirroring administration		
Copy volume function overview						
Copy volume administration		Module 9: Mirroring Administration		SANtricity feature considerations		
		Resources for collection and monitoring				
		Storage array component information				
		AutoSupport support tool				
		Informational files				
Module 10: Data Collection and Monitoring		Performance monitoring		Module 11: General Administrative Tasks		
General administrative tasks						
Alert management						
Storage array, controller and drive tasks						
Managing upgrades						

Test and Certification

This course is part of the NetApp Certified Implementation Engineer (NCIE) – SAN Specialist (E-Series) certification

Options

Training Units: 48

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
19 Aug 2024	Virtual Classroom (GMT / UTC)	BST	English	Instructor Led Online		€3,800.00
07 Oct 2024	Virtual Classroom (GMT / UTC)	BST	English	Instructor Led Online		€3,800.00
