Creating Field Extractions

CODE:	LÄNGE:	PREIS:
SPL_SCFE	0.96 Hours (0.12 Tage)	€1,500.00

Description

This three-hour course is for knowledge managers who want to learn about field extraction and the Field Extractor (FX) utility. Topics will cover when certain fields are extracted and how to use the FX to create regex and delimited field extractions.

Lernziel

- Using the Field Extractor
- Creating Regex Field Extractions
- Creating Delimited Field Extractions

Zielgruppe

Search Experts Knowledge Managers

Voraussetzungen

To be successful, students should have a solid understanding of the following:

- How Splunk works
- Knowledge Objects

Inhalt

Topic 1 – Using the Field Extractor

- Understand types of extracted fields and when they are extracted
- Explore the Splunk Web Field Extractor (FX)

Topic 2 – Creating Regex Field Extractions

- Identify basics of regular expressions (regex)
- Understand the regex field extraction workflow
- Edit regex for field extractions

Topic 3 – Creating Delimited Field Extractions

- Identify delimited field values in event data
- Understand the delimited field extraction workflow

Weitere Informationen

Individuals who enroll in this class will also be enrolled in an (eLearning with Labs) component. Completion of labs and quizzes is required in order to receive proof of completion.
