Leveraging Lookups and Subsearches

CODE:	LENGTH:	PRICE:
SPL_SLLAS	0.96 Hours (0.12 days)	kr5,075.00

Description

This three-hour course is designed for power users who want to learn how to use lookups and subsearches to enrich their results. Topics will focus on lookup commands and explore how to use subsearches to correlate and filter data from multiple sources.

Objectives

- Using Lookup Commands
- Adding a Subsearch
- Using the return Command

Audience

Search Experts Knowledge Managers

Prerequisites

To be successful, students should have a solid understanding of the following:

- How Splunk works
- Creating Search queries
- Lookups

Programme

Topic 1 – Using Lookup Commands

- Understand lookups
- Use the inputlookup command to search lookup files
- Use the lookup command to invoke field value lookups
- Invoke geospatial lookups in search

Topic 2 – Adding a Subsearch

- Define subsearch

- Use subsearch to filter results
- Identify when to use subsearch
- Understand subsearch limitations and alternatives
Topic 3 – Using the return Command
- Use the return command to pass values from a subsearch
- Compare the return and fields commands

Further Information

Individuals who enroll in this class will also be enrolled in an (eLearning with Labs) component. Completion of labs and quizzes is required in order to receive proof of completion.
