Description

The Check Point CCSA course provides an understanding of basic concepts and skills necessary to configure Check Point Security Gateway and Management Software Blades.

(Supported Versions: R80.10, R80.20)

Objectives

Provide an understanding of basic concepts and skills necessary to configure Check Point Security Gateway and Management Software Blades.

- Interpret the concept of a Firewall and understand the mechanisms used for controlling network traffic.
- Describe the key elements of Check Point's unified Security Management Architecture.
- Recognize SmartConsole features, functions and tools. Understand Check Point deployment options.
- Describe the basic functions of Gaia. Describe the essential elements of a Security Policy.
- Understand how traffic inspection takes place in a unified Security Policy.
- Summarize how administration roles and permissions assist in managing policy. Recall how to implement backup techniques.
- Understand the Check Point policy layer concept.
- Recognize Check Point security solutions and products and how they work to protect your network.
- Understand licensing and contract requirements for Check Point security products.
- Identify tools designed to monitor data, determine threats and recognize performance improvements.

Identify tools designed to respond quickly and efficiently to changes in gateways, tunnels, remote users, traffic flow patterns, and other activities.

• Understand Site-to-Site and Remote Access VPN deployments and communities.

- Understand how to analyze and interpret VPN traffic. Recognize how to define users and user groups.
- Understand how to manage user access for internal and external users.
- Understand the basic concepts of ClusterXL technology and its advantages.
- · Understand how to perform periodic administrator tasks as specified in administrator job descriptions

Audience

Technical professionals who support, install, deploy or administer Check Point Software Blades.

Prerequisites

- General knowledge of TCP/IP
- Working knowledge of Windows and/or UNIX, network technology and the Internet

Programme

- Introduction to Check Point Technology
 Security Policy Management
 Policy Layers
- Check Point Security Solutions and Licensing
 Traffic Visibility
 Basic Concepts of VPN
 Managing User Access
- Working with ClusterXL
 Administrator Task Implementation LAB EXERCISES
 Working with Gaia Portal
 - Modifying an Existing Security Policy
 Configuring Hide and Static NAT
 Managing Administrator Access
 - Installing and Managing a Remote Security Gateway
 Managing Backups
 Defining Access Control Policy Layers
 - Defining and Sharing Security Policy Layers Working with Licenses and Contracts Working with Check Point Logs
 - Maintaining Check Point Logs
 Configuring a Site-to-Site VPN
 Providing User Access
 Working with Cluster XL
 - Verifying Network Compliance Working with CP View

Test and Certification

Prepare for exam #156-215.80 at <u>www.VUE.com/checkpoint</u> Exam vouchers available at an additional cost from <u>edu.ecs.se@arrow.com</u> +46 8 555 188 00

Further Information

Please note that Check Point only offer e-kit courseware for training courses. Each delegate will be provided with an official set of e-kit courseware.
