Cortex XSOAR: Automation and Orchestration

CODE:	LENGTH:	PRICE:
PAN_EDU-380	4 day(s)	£2,880.00

Description

The Cortex™ XSOAR 6.2: Automation and Orchestration (EDU-380) course is four days of instructor-led training that will help you:

- Configure integrations, create tasks, and develop playbooks
- Build incident layouts that enable analysts to triage and investigate incidents efficiently
- Identify how to categorize event information and map that information to display fields
- Develop automations, manage content, indicator data, and artifact stores, schedule jobs, organize users and user roles, oversee case management, and foster collaboration

Objectives

This training is designed to enable a SOC, CERT, CSIRT, or SOAR engineer to start working with Cortex XSOAR integrations, playbooks, incident-page layouts, and other system features to facilitate resource orchestration, process automation, case management, and analyst workflow.

The third module of the course demonstrates a complete playbook-development process for automating a typical analyst workflow to address phishing incidents.

This end-to-end view of the development process provides a framework for more focused discussions of individual topics that are covered in subsequent modules.

Audience

Security-operations (SecOps), or security, orchestration, automation, and response (SOAR) engineers, managed security service providers (MSSPs), service delivery partners, system integrators, and professional services engineers.

Prerequisites

Participants must complete the Cortex XSOAR Analyst digital learning.

Participants who have experience with scripting, the use of Python and JavaScript, and the use of JSON data objects will likely be able to apply what they learn more quickly than participants without such experience. However, completion of the course does not require proficiency in writing code.

Programme

1 - Core functionality and Feature Sets 2 - Enabling and Configuring Integrations 3 - Playbook Development
4 - Classification and Mapping 5 - Layout Builder 6 - Solution Architecture 7 - Docker 8 - Automation Development & Debugging
9 - Content Management 10 - Indicators 11 - Jobs and Job Scheduling 12 - Users and Role Management
13 - Integration Development

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
14 Nov 2022	Virtual Classroom	GMT	English	Instructor Led Online		£2,880.00
14 Nov 2022	London - Dowgate Hill	GMT	English	Classroom		£2,880.00
