Introduction to Azure AD DS and Hybrid Infrastructures

CODE:	LENGTH:	PRICE:
MCS_WS-RDAZADDS	8 Hours (1 day)	Request Price

Description

This one-day course will cover how to build a hybrid infrastructure for global identification and device enrollment into a deported Global Catalog, based on the legacy AD DS, with an Azure solution. You will discover how hybrid configuration could help your organization to create a serverless solution.

Objectives

Introduction of Microsoft Entra | Deploying Azure AD DS
- Azure AD DS solution and dependencies - Deploy an domain & joining devices
Sync with AAD and advantages | Policies through Endpoint Manager for Azure AD DS
- Creating Azure AD join and managing Groups & Users - Migrating GPO to Policies

Audience

This one-day course is aimed at administrators and IT professionals who want to deepen their know-how to do an implementation with Azure and AD DS hybrid solutions.

Prerequisites

- Good understanding of Microsoft 365 and Windows 10 / 11 installation steps
- Good knowledge of AAD and AD
Before attending this course, students must have: - Understanding of security behaviors and GPO's implementations
Demos are based on current version of products and could be in some cases, with interactive guides for attendees.

Programme

Module 1: "Introduction of Microsoft Entra"
This module provides an overview of Microsoft Entra and how to manage Hybrid identities, with Azure AD.
- Discuss Entra access and overview Console
After completing this module, students will be able to: - Understand the dependencies and the entities AD DS and Azure AD DS
Module 2: "Deploying Azure AD DS" This module discusses the implementation of Azure AD DS and how to link with AAD.
- Deploy Azure AD DS
After completing this module, students will be able to: - Create a link to AAD   Module 3: "Sync with AAD and advantages"
This module discusses how to include a device into the Azure AD DS domain & managing device attribution to user. We will also see Users & Group Management.
- Establish a domain join with a Windows 10 / 11 Device
After completing this module, students will be able to: - Manage Users & Groups in Azure AD DS
Module 4: "Policies through Endpoint Manager for Azure AD DS"
This module discusses how to import classic GPO's into Cloud Policies and managing it through Microsoft Endpoint Manager.
- Import GPO's into MEM
After completing this module, students will be able to: - Manage Policies through MEM
