Microsoft Power Platform - RPA in a Day

CODE:	**LENGTH:**	**PRICE:**
MCS_WS-RDPBIRPA	8 Hours (1 day)	Request Price

Description

This one-day instructor-led workshop focuses on using desktop flows to solve a common automation business scenario. The training is designed to on-board and train everyone. No matter if you are a business expert or IT developer, you will learn to develop RPA automation in a single day using desktop flows.

The hands-on, step-by-step lab exercises guide you through building a modern end to end business RPA scenario to process incoming invoices. Inside the labs, you will use Power Automate capabilities such as desktop flows and API connectors to automate a business process. In addition, you will also take advantage of form processing models developed in AI Builder.

At the end of the day, you will be able to:

- Create desktop flows

- Use Power Automate to run desktop flows

- Use AI Builder to extract information from documents

- Test and run desktop flows

Audience

This one-day workshop is intended for anyone interested in automating legacy applications.

Prerequisites

Before attending this course, students must have:

- There are no prerequisites for this workshop

Attendees will require access to a Windows computer and a modern browser. Attendees will also require the ability to install Windows software on their computer. Windows Professional or Enterprise is required to run a desktop flow in unattended mode.
