### VMware SD-WAN: Deploy and Manage [V4.x]

Kód: DÉLKA: CENA:

VMW\_SDWANDM4 16 Hours (2 DENNÍ) Kč bez DPH 20,000.00

#### Description

Školení je vedené virtuálně v angličtině. Cena kurzu je 750 EUR a bude přepočtena aktuálním kurzem poslední den školení.

This two-day, hands-on training course provides you with the knowledge, skills, and tools to achieve competency in deploying and managing the VMware SD-WAN by VeloCloud® environment. In this course, you are introduced to workflows of various software-defined WAN constructs along with several operational tools that help you deploy and manage VMware SD-WAN by VeloCloud. Product Alignment

• VMware SD-WAN<sup>™</sup> 4.4

#### Cíle

By the end of the course, you should be able to meet the following objectives:

- Discuss the SD-WAN architecture and platform deployment model options
- · Identify and describe the SD-WAN solution components
- Explain the interaction between the SD-WAN Edge, Orchestrator, and Gateway components
- Describe the SD-WAN Software-Defined Networking (SDN) approach, traffic, and network flows
- Explore SD-WAN core features and evaluate how these dramatically improve operational automation
- · Use SD-WAN features to perform simple, agile, and secure SD-WAN operations

• Simplify branch infrastructure by inserting network services on the branch edge, in the cloud, or in the regional and enterprise data centers

#### Určeno pro

• Experienced system administrators, network administrators, and system integrators responsible for designing and implementing networking solutions

· Network and security professionals who work with enterprise and data center networks

#### Vstupní znalosti

• Extensive knowledge of routing and switching is required.

- You should also have the following understanding or knowledge:
- Good understanding of TCP/IP services and protocols
- Knowledge and working experience of computer networking, including:
- Switching and routing technologies (L2-L3)
- Network and application delivery services (L4-L7)
- Basic understanding of laaS, SaaS, and public and private cloud
- The VMware Certified Professional Network Virtualization (2020) certification is recommended.

#### Program

- 2 Introduction to VMware SD-WAN Solution
- Revisit the traditional WAN technology, WAN topologies and downsides
- Explain the challenges solved by Secure Access Service Edge (SASE) and use cases
- Introductions and course logistics List the components of the VMware SASE<sup>™</sup> solution
- Course objectives

1 Course Introduction

Describe the VMware SD-WAN solution and list its capabilities

#### 3 VMware SD-WAN Components and Architecture

- Understand the architecture of the VMware SD-WAN solution and list all its components
- Explain the function of VMware SD-WAN Edges, Hub, Gateways, controllers, and Orchestrator
- Explain how the components of the VMware SD-WAN solution interact with each other
- 4 Using VMware SD-WAN Orchestrator
- Describe key attributes of the VMware SD-WAN Orchestrator
- · List primary features of the VMware SD-WAN Orchestrator
- Navigate the main menus of the VMware SD-WAN Orchestrator portal
- 5 Deploy and Configure VMware SD-WAN

Understand the deployment process of VMware SD-WAN components like VMware SD-WAN Edges,

Hubs, Gateways, and more

- Understand the workflow of the VMware SD-WAN configuration
- · List the optional network services that are supported by VMware and the steps to configure the same
- · Understand the profiles and their application in the VMware SD-WAN infrastructure
- Describe the VMware SD-WAN Edge activation process

6 Path and Traffic Management

- List the routing options supported by VMware SD-WAN: Static, BGP, OSPF
- · Understand the Dynamic Multipath Optimization (DMPO) feature and its advantages
- Explain the Quality of Service and its configuration to manage traffic
- 7 Securing VMware SD-WAN Environment
- Explain various options available to secure VMware SD-WAN environments.
- Understand the firewall capabilities and configuration
- 8 Monitoring, Maintenance, and Troubleshooting
- List and understand the various features available to monitor the VMware SD-WAN infrastructure

 List and understand the various options available to troubleshoot and investigate issues in VMware SD-WAN

#### Termíny školení

Termíny školení na vyžádání, kontaktujte nás prosím

#### Dodatečné informace

Školení je možné zajistit na míru. Kontaktujte nás pro bližší informace.
