ONTAP Performance Analysis (ONTAP 9.6)

CODE:

NEP_OT-CLU-PA9.6

LENGTH:

24 Hours (3 dage)

PRICE:

kr 20,850.00

Description

This course enables you to collect and analyze system performance data from NetApp® storage systems that run NetApp ONTAP® 9 software. You learn how to interpret data and how to identify and implement changes that improve system efficiency. You also learn how to use system commands and features to monitor and enhance storage system performance. You learn from hands-on exercises, case studies, and technical discussions.

Objectives

- Describe how to use NetApp tools for performance measurement
- Describe the layers within the ONTAP architecture
- Diagram the flow of read and write requests through the network and data layers of ONTAP software
- Discuss how storage quality of service (QoS) operates in an ONTAP cluster
- Explain how to monitor and manage workload performance
- Use the performance analysis tools to identify NAS and SAN performance obstacles

Audience

Professionals who manage NetApp storage systems and would like a deeper understanding of Clustered Data ONTAP system performance

Prerequisites

Hands-on experience with ONTAP software (6 months to 12 months) is required in addition to the OT-CLU-DPA instructor led class..

OT-CLU-DPA - ONTAP Cluster Administration and Data Protection

Programme

Basic Concepts of Performance

Module 1: Performance Analysis Fundamentals Performance Monitoring Methodology **Module 2: Performance Analysis Tools**

Performance terminology FAS and AFF Architecture
Using Active IQ Unified Manager Data Flow

Module 3: Storage System Architecture and Data Flow NVRAM Functionality

WAFL Functions

Identifying CPU Performance Bottlenecks

WAFL Readahead

Resolving CPU Performance Bottlenecks

Module 4: WAFL Resolving WAFL issues **Module 5: CPU and Memory** Identifying Memory Performance Bottlenecks

Disk Subsystem Hardware

Resolving Memory Performance Bottlenecks

Analyzing and Isolating Disk Subsystem Bottlenecks

Analyzing Disk Subsystem Bottlenecks with Statit

Module 6: Disk Subsystem Resolving Disk Subsystem Bottlenecks

Module 7: Cache Subsystem

Cache Subsystem Overview

Flash Cache Feature

Flash Pool Feature

Flash Cache Policies and Flash Pool Policies

Storage Pool

Cache Sizing

Module 8: Storage Quality of Service Managing System Performance with QoS

NAS functions

Identifying NAS Bottlenecks

Module 10: SAN Subsystem

SAN protocol performance
