Check Point Certified Security Expert (CCSE) R80.40

CODE:

CKT_CCSE_R80.X

LENGTH:

24 Hours (3 days)

PRICE:

kr26,500.00

Description

The CCSE course validates your understanding and skills necessary to configure and optimally manage Check Point Next Generation Firewalls.

(Supported Versions: R80.10, R80.20)

Objectives

- Identify advanced CLI commands.
- Understand system management procedures, including how to perform system upgrades and apply patches and hotfixes.
- Describe the Check Point Firewall infrastructure.
- Describe advanced methods of gathering important gateway data using CPView and CPInfo.
- Recognize how Check Point's flexible API architecture supports automation and orchestration.
- Discuss advanced ClusterXL functions.
- Describe VRRP network redundancy advantages.
- Understand how SecureXL acceleration technology is used to enhance and improve performance.
- Understand how CoreXL acceleration technology is used to enhance and improve performance.
- Identify the SmartEvent components that store network activity logs and identify events.
- Discuss the SmartEvent process that determines which network activities may lead to security issues.
- Understand how SmartEvent can assist in detecting, remediating, and preventing security threats.
- Discuss the Mobile Access Software Blade and how it secures communication and data.
- Understand Mobile Access deployment options.
- Recognize Check Point Remote Access solutions.
- Discuss Check Point Capsule components and how they protect mobile devices and business documents.
- Discuss different Check Point Solutions for attacks such as zero-day and Advanced Persistent Threats.
- Understand how SandBlast, Threat Emulation, and Threat Extraction prevent security incidents.
- Identify how Check Point Mobile Threat Prevention can help protect data accessed on company-issued smartphones and tablets.

Audience

Expert users and resellers who need to perform advanced deployment configurations of Check Point Software Blades.

Prerequisites

- CCSA training/certification
- Working knowledge of Windows, UNIX, networking, TCP/IP, and the Internet.

Programme

	<ul style="list-style-type: none"> • Upgrading a Security Management Server to R80.10 • Applying Check Point Hotfixes • Configuring a New Security Gateway Cluster • Core CLI Elements of Firewall Administration • Configuring Manual Network Address Translation • Managing Objects Using the Check Point API • Enabling Check Point VRRP • Deploying a Secondary Security Management Server • Viewing the Chain Modules • Working with SecureXL • Working with CoreXL • Evaluating Threats with SmartEvent • Managing Mobile Access • Understanding IPS Protections • Deploying IPS Geo Protection
<ul style="list-style-type: none"> • System Management • Automation and Orchestration • Redundancy • Acceleration • SmartEvent • Mobile and Remote Access 	
COURSE TOPICS • Threat Prevention	LAB EXERCISES • Reviewing Threat Prevention Settings and Protections

Test and Certification

Prepare for exam #156-315.80 at www.VUE.com/checkpoint

Exam vouchers are available for purchase directly from Arrow ECS (edu.ecs.se@arrow.com +46 8 555 188 00)

Further Information

Please note that Check Point only offer e-kit courseware for training courses. Each delegate will be provided with an official set of e-kit courseware.
