Check Point Certified Multi-Domain Security Management Specialist R81.1 (CCMS)

Kód: DÉLKA: CENA:

CKT CCMS R81.X 16 Hours (2 DENNÍ) Kč bez DPH 43,000.00

Description

Gain advanced skills for effectively securing and managing a multi-domain enterprise security network. Apply understanding of open-source and Check Point troubleshooting tools and techniques to investigate and resolve complex issues.

Cíle

- · List and describe the function of each component in the Check Point MDSM solution.
- Explain how these components work together to help administrators manage multiple network security environments within a large network.
- Demonstrate understanding of how to install and configure the MDSM environment.
- Summarize the steps required to migrate a Security Management Server into a Domain Management Server.
- Explain how to implement MDSM High Availability using Secondary Multi-Domain and Domain Management Servers.
- Explain how to configure and manage policies from a Secondary Domain Management Server.
- Explain the difference between the two types of Log Server options used to store logs in MDSM.
- List the different types of activity logs available when using SmartConsole.
- Describe how to view and manage Multi-Domain activity logs in SmartConsole
- Describe how a Global Policy works in a distributed network.
- Describe how to configure a Global Policy to manage rules for multiple domains.
- Summarize the steps required to deploy a Global Policy. Explain how to integrate SmartEvent into a Multi-Domain Environment.
- Explain how to perform configuration changes on an MDS.
- Describe how to use troubleshooting and debugging tools on an MDS.
- Describe the techniques used to investigate and resolve issues with the Check Point Security Management architecture and Security Gateways

Exercises • Exploring the Multi-Domain Environment • Migrating an SMS to a Domain Management Server

- Implementing Multi-Domain Management High Availability Deploying a Multi-Domain Log Server
- Deploying a Global Security Policy Integrating SmartEvent into a Multi-Domain Environment
- Performing Multi-Domain CLI Diagnostics
 Troubleshooting Multi-Domain Security Management Servers

Určeno pro

This two-day course is designed for security professionals who install, configure, and manage multiple security domains within their network security environment.

Vstupní znalosti

Solid knowledge of Unix-based and/or Windows OS and TCP/IP Networking. Check Point training/ certification: CCSA and CCSE. CCVS and CCAS are useful but not required.
