# ONTAP Performance Analysis (ONTAP 9.6)

## CODE:

NEP\_OT-CLU-PA9.6

## LENGTH:

24 Hours (3 days)

## PRICE:

kr28,950.00

## Description

This course enables you to collect and analyze system performance data from NetApp® storage systems that run NetApp ONTAP® 9 software. You learn how to interpret data and how to identify and implement changes that improve system efficiency. You also learn how to use system commands and features to monitor and enhance storage system performance. You learn from hands-on exercises, case studies, and technical discussions.

## Objectives

- Describe how to use NetApp tools for performance measurement
- Describe the layers within the ONTAP architecture
- Diagram the flow of read and write requests through the network and data layers of ONTAP software
- Discuss how storage quality of service (QoS) operates in an ONTAP cluster
- Explain how to monitor and manage workload performance
- Use the performance analysis tools to identify NAS and SAN performance obstacles

## Audience

Professionals who manage NetApp storage systems and would like a deeper understanding of Clustered Data ONTAP system performance

## Prerequisites

Hands-on experience with ONTAP software (6 months to 12 months) is required in addition to the OT-CLU-DPA instructor led class..

**OT-CLU-DPA - ONTAP Cluster Administration and Data Protection**

## Programme

Basic Concepts of Performance

**Module 1: Performance Analysis Fundamentals** Performance Monitoring Methodology **Module 2: Performance Analysis Tools**

Performance terminology FAS and AFF Architecture  
Using Active IQ Unified Manager Data Flow

**Module 3: Storage System Architecture and Data Flow** NVRAM Functionality

WAFL Functions

Identifying CPU Performance Bottlenecks

WAFL Readahead

Resolving CPU Performance Bottlenecks

**Module 4: WAFL** Resolving WAFL issues **Module 5: CPU and Memory** Identifying Memory Performance Bottlenecks

Disk Subsystem Hardware

Resolving Memory Performance Bottlenecks

Analyzing and Isolating Disk Subsystem Bottlenecks

Analyzing Disk Subsystem Bottlenecks with Statit

**Module 6: Disk Subsystem** Resolving Disk Subsystem Bottlenecks

**Module 7: Cache Subsystem**

Cache Subsystem Overview

Flash Cache Feature

Flash Pool Feature

Flash Cache Policies and Flash Pool Policies

Storage Pool

Cache Sizing

**Module 8: Storage Quality of Service** Managing System Performance with QoS

- SAN Overview
- SAN Multipathing
- SAN load balancing
- SAN I/O Misalignment
- Queue depth

## Module 10: SAN Subsystem Queue depth

- Identifying cluster components
- Analyzing performance statistics
- OnCommand performance manager thresholds, events and alerts
- Identifying and resolving storage controller performance issues
- WAFL performance monitoring and analysis
- Identifying and resolving disk I/O bottlenecks
- Exploring cache performance
- Cluster interconnect performance
- Workload management with storage QoS
- NAS performance
- SAN protocol performance

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
13 May 2024	Virtual Classroom (GMT / UTC)	BST	English	Classroom		kr28,950.00
08 Jul 2024	Virtual Classroom (GMT / UTC)	BST	English	Classroom		kr28,950.00
09 Dec 2024	Virtual Classroom (GMT / UTC)	GMT	English	Classroom		kr28,950.00
