IBM InfoSphere QualityStage Essentials V11.5 - SPVC

Kód: 2M213G **DÉLKA:** 4 (den) **CENA:** Kč 28,360.00

Description

This course teaches how to build QualityStage parallel jobs that investigate, standardize, match, and consolidate data records. Students will gain experience by building an application that combines customer data from three source systems into a single master customer record.

Cíle

- List the common data quality contaminants
- Describe each of the following processes:
 - Investigation
 - Standardization
 - Match
 - Survivorship
- Describe QualityStage architecture
- Describe QualityStage clients and their functions
- Import metadata
- Build and run DataStage/QualityStage jobs, review results
- Build Investigate jobs
- Use Character Discrete, Concatenate, and Word Investigations to analyze data fields
- Describe the Standardize stage
- Identify Rule Sets
- Build jobs using the Standardize stage
- Interpret standardization results
- Investigate unhandled data and patterns
- Build a QualityStage job to identify matching records
- Apply multiple Match passes to increase efficiency
- Interpret and improve match results
- Build a QualityStage Survive job that will consolidate matched records into a single master record
- Build a single job to match data using a Two-Source match

Určeno pro

- Data Analysts responsible for data quality using QualityStage
- Data Quality Architects
- Data Cleansing Developers

Vstupní znalosti

Participants should have:

- Familiarity with the Windows operating system
- Familiarity with a text editor

Helpful, but not required, would be some understanding of elementary statistics principles such as weighted averages and probability.

Program

1. Data Quality Issues
 - Listing the common data quality contaminants
 - Describing data quality processes
2. QualityStage Overview
 - Describing QualityStage architecture
 - Describing QualityStage clients and their functions
3. Developing with QualityStage
 - Importing metadata
 - Building DataStage/QualityStage Jobs
 - Running jobs
 - Reviewing results
4. Investigate
 - Building Investigate jobs
 - Using Character Discrete, Concatenate, and Word Investigations to analyze data fields
 - Reviewing results

5. Standardize

- Describing the Standardize stage
- Identifying Rule Sets

6. Match

- Building jobs using the Standardize stage
- Building a QualityStage job to identify matching records
- Interpreting standardize results
- Applying multiple Match passes to increase efficiency
- Investigating unhandled data and patterns
- Interpreting and improving Match results

7. Survive

- Building a QualityStage survive job that will consolidate matched records into a single master record

8. Two-Source Match

- Building a QualityStage job to match data using a reference match

Více informací

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Termíny školení

Datum	Místo konání	Časové pásmo	Jazyk	Typ	Garance termínu	CENA
27 Jan 2022			English	Self Paced Training		Kč 28,360.00
