NetApp   **Protecting SQL Server**

CODE:	LENGTH:	PRICE:
NEP_PROTSQL	16 Hours (2 days)	£1,795.00

Description

This course covers the deployment of the SnapCenter Plug-in for Microsoft SQL Server. In this course, you learn about the features of the plug-in and how to install and perform initial configuration of the plug-in. You learn how to protect, clone, and restore Microsoft SQL Server databases by using SnapCenter software. Through instructor-led presentations, you gain knowledge about these topics. Hands-on exercises provide you with experience in performing these tasks.

Objectives

- Describe the features of the Microsoft SQL Server Plug-in
- List the workflow for using SnapCenter software to protect Microsoft SQL Server databases
- Explain how SnapCenter software uses NetApp technology to protect SQL Server databases
- Illustrate the recommended NetApp storage layouts to support SQL Server data
- Describe data protection strategies for SQL Server databases by using SnapCenter software
- Demonstrate how to configure and perform SQL Server database backups by using SnapCenter software
- Demonstrate SQL Server database restores that use SnapCenter software
- Describe cloning strategies that use SnapCenter software and NetApp technology
- Build alerting and reporting operations for Plug-in for SQL Server

Audience

- NetApp and NetApp Partner Professional Services
- Systems Engineers
- NetApp Customers

Prerequisites

The following 5 day instructor led class is required..   **OT-CLU-DPA - ONTAP Cluster Administration and Data Protection**
In addition to the following 3 day instructor led class..   **SNAP-C-ADM - NetApp SnapCenter Administration**
The SnapCenter Fundamentals free of charge elearning is also required which can be accessed directly from the NetApp Learning Centre. Please contact us for further help as required
   Contact Us

Programme

Module 1: SnapCenter Plug-In for Microsoft SQL Server Overview

- Features
- MS SQL server data protection workflow

Module 2: Getting Started with the SnapCenter Plug-In for MS SQL Server

- Prerequisite tasks for using the Plug-In

- Installation steps for the Plug-in

- Plug-in configuration

- Storage layout recommendations and restrictions

- Storage design for a virtualized environment
  Module 3: Data Migration

- Resource wizard

- Importing from SnapManager software
  Module 4: Creating and Backing up SQL Server Resources

- Data protection strategy

- Backing up SQL server databases
  Module 5: Restoring SQL Server Resources

- Defining a restore strategy

- Restoring SQL server databases
  Module 6: Cloning SQL Server Databases

- Defining a cloning strategy

- Cloning a SQL server database backup

- Splitting a SQL server cloned database

- Clone lifecycle management
  Module 7: Monitoring and Managing SQL Server Operations

- Monitoring operations

- Canceling a database backup operation

- Monitoring and managing a thin-provisioned environment

- Setting thresholds, alerts and reports
  Labs:

- Configuring SnapCenter and install plug-ins for MS SQL Server

- Migrating databases

- Protecting a MS SQL server database

- Restoring a MS SQL server database

- Cloning a MS SQL server database

- Performing management and monitoring tasks by using SnapCenter software and NetApp ONTAP system manager
  Appendix A - Challenge labs:

- Migrating a database from existing volume to a new volume

- Configuring backup and replication for the newly migrated database

- Configuring a clone lifecycle for the development team

- Performing a point-in-time restore to remove database corruption

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
19 Aug 2024	Virtual Classroom	BST	English	Classroom		£1,795.00
07 Oct 2024	Virtual Classroom	BST	English	Classroom		£1,795.00
09 Dec 2024	Virtual Classroom	GMT	English	Classroom		£1,795.00

Additional Information

This training is also available as onsite training. Please contact us to find out more.
