# **Designing HPE Nimble Solutions**

CODE: LENGTH: PRICE:

HPE-DNS 16 Hours (2 days) \$1,800.00

# **Description**

The Designing HPE Nimble Solutions course is an instructor-led course. This course teaches students how to identify, recommend, and explain HPE Nimble storage solutions. It covers the HPE Nimble hardware and software, initial configuration, HPE Nimble Storage Volumes, snapshots, and replication. The course uses participant centered learning and hands-on labs. This course prepares the Learner for the HPE Product Certified - Nimble Solutions [2018].

# **Objectives**

After you successfully complete this course, expect to be able to:

Describe the AF-Series hardware

Explain Scale-to-Fit with the CSx000

Describe the AF-Series Write Operations

Explain how to access and navigate the NimbleOS WebUI

Navigate the InfoSight Customer portal

List port and firewall considerations

Analyze the NimbleOS event log

Create protection templates

Configure access control and initiator groups

Describe the need to add RPO, RTO and Change Rate definitions

Explain how replication works

Discuss the replication considerations

### **Audience**

Typical candidates for this course are IT, facilities or data center professionals, who work in and around the data center and who have the responsibility to achieve and improve the availability and manageability of the data center. Typical candidate job roles include but are not limited to Pre-sales Architects, Pre-sales Engineers, Enterprise Architects, Solutions Engineers, and Technology Architects.

### **Programme**

Module 3: NimbleOS architecture

Describe the AF-Series Write Operations

Deduplication Compression

Sequential stripe writes

Triple+ Parity with Integrated Spare

Integrated spare rebuild Quick RAID rebuild SmartSecure Encryption

Describe the AF-Series Read Operations

Module 2: The Adaptive Flash Array (CS-Series) Changed block operations

Describe the CSx000 Write Operations
Describe the CSx000 Read Operations

**Topics** 

Module 1: AF-Series introduction
Describe the AF-Series hardware

Module 2: The Adaptive Flash A
Describe the CSx000 hardware

Explain Scale-to-Fit with the AF-Series Explain Scale-to-Fit with the CSx000

Module 4: NimbleOS WebUI introduction

Explain how to access and navigate the NimbleOS WebUI

Explain user administration

Explain how to monitor the array with the WebUI

Explain how to update NimbleOS

Module 5: Introduction to Support and InfoSight Describe how to use Microsoft's Active Directory with user administration Explain Nimble Support's mission statement Navigate the InfoSight Customer portal Describe support coverage and logistics

Module 7: Working with Nimble Storage Volumes

Module 6: Array initialization and setup Explain basic volume concepts Explain an array initialization process Create performance policies

Explain an array configuration process Configure access control and initiator groups

List port and firewall considerations Create protection templates Describe SNMP setup Create volume collections Discuss SYSLOG use Explain volume pinning

Analyze the NimbleOS event log Create a volume using the WebUI

Module 9: Introduction to Nimble Storage replication

Describe basic replication concepts List SmartReplicate components

Module 8: Introduction to Nimble SmartSnap Describe how Nimble snapshots work Explain how replication works Explain snapshot scheduling Describe replication process

Describe the need to add RPO, RTO and Change Rate definitions Discuss the replication considerations Explain how to recover from a snapshot using Zero Copy Clones Explain SmartReplicate Disaster Recover

#### **Session Dates**

On request. Please Contact Us

### **Additional Information**

This training is also available as onsite training. Please contact us to find out more.
