Red Hat OpenShift Development II: Creating Microservices with Red Hat OpenShift Application Runtimes

CODE:	**LENGTH:**	**PRICE:**
REH_DO292	32 Hours (4 days)	Request Price

Description

Red Hat OpenShift Development II: Creating Microservices with Red Hat OpenShift Application Runtimes (DO292) introduces you to three runtimes: WildFly Swarm, Vert.x, and Spring Boot. This course is an intensive, hands-on programming experience in which you will develop multiple microservices using the three runtimes and deploy them on a Red Hat® OpenShift Container Platform cluster.
This course is delivered as an on-site class, as online/video training or by virtual classroom.

Audience

• Java application developers interested in employing microservices architectures
• Software architects interested in creating and deploying microservices

Prerequisites

• Have completed Red Hat Application Development I: Implementing Microservice Architectures (JB283), or demonstrate equivalent experience with microservice architecture
• Being a Red Hat Certified System Administrator (RHCSA) or higher is helpful, for navigation and usage of the command line
• Being a Red Hat Certified Specialist in Containerized Application Development, completing Red Hat OpenShift Development I: Containerizing Applications (DO288), or experiencing developing and deploying containerized applications to an OpenShift cluster

Programme

• Deploy microservices with WildFly Swarm
• Deploy microservices with Vert.x
• Deploy microservices with Spring Boot
• Develop an API gateway
• Implement fault tolerance with Hystrix
