IBM Engineering Workflow Management 7 (RTC) - Project Configuration

CÓDIGO:	DURACIÓN:	Precio:
ZL1_U4ZEWMC7	8 Hours (1 dia)	€780.00

Description

This course focuses on configuration of project areas and global settings. You will learn best practices, possibilities and gain hands-on experience with how projects can be effectively tailored, managed, and maintained.

Objetivos

• Define work item types, attributes, categories
• Adjust predefined queries
• Define workflows
• Configure work item presentations
• Configure roles and access rights
• Adjust behavior and constraint settings
• Manage link types
• Define dashboard templates
• Work with project templates
• Use a master project

Público

• Senior Product Users
• Administrators and those responsible for Project Areas
• Release Managers

Requisitos Previos

These courses or equivalent knowledge is highly recommended: U4ZEWMP7 - IBM Engineering Workflow Management 7 (RTC) - Project Planning and Tracking
