Safer Payments Hands-On Technical Primer (In-Depth)

Kod:	Czas trwania:	Cena netto:
6A021G	40 Hours (5 days)	Request Price

Description

This is the in-depth version of course 6A020. It includes all topics covered in 6A020, plus an additional day of instruction in which students will learn skills and best practices for implementing Safer Payments for clients.
6A020 - In this course, technical resources that will be involved in any aspect of deploying, customizing, and implementing the Safer Payment solution will get a hands-on overview of the product. Students will get an understanding of how to install, configure, and setup the system for Analysts as well as basics on system administration.

Cel szkolenia

After completing this class, students should be able to:

- Install and Configure Safer Payments
- Understand how to ingest/map data into Safer Payments
- Understand and configure clustering and redundancy.
- Understand Disk file structure and configuration
- Performance factors and impact of data size and memory size

Uczestnicy

Intended Audience

- technical resources who will be installing and maintaining the implementation
- IBM Lab Services

Wymagania wstępne

- Must be familiar with unix command line navigation and configuration actions
- Some familiarity with payment processing systems
- Familiarity with the concepts of clustering and network/firewall topics
- Familiarity and comfort with troubleshooting and problem determination processes

Program szkolenia

- Introductory Overview of Safer Payments
- Unix Installation
- Clustering and Configuration and Encryption
- System and Performance Configuration Settings
- Mandators and Data Modeling
- Roles and User Configuration
- New Environment Elements
- Output Notifications and Integration (Lab1H_SPOutputNotifiationsIntegration)

- Transaction ETL, Master Data
- Cluster Monitoring
- Redundancy and Disaster Recovery
- Config Export and Migrate
- Upgrade/Backup/Restore
