Db2 11.1 Advanced Database Administration

Kod:	**Czas trwania:**	**Cena netto:**
2L464G	16 Hours	zł4,950.00

Description

This course is designed to teach you how to: • Perform advanced monitoring using the Db2 administrative views and routines in SQL queries. • Manage the disk space assigned in Database Managed Storage (DMS) and Automatic Storage table spaces, including the activities of the rebalancer. • Use SQL queries and Db2 commands to check the high water mark on table spaces and to monitor the rebalance operation. • Utilize the REBUILD option of RESTORE, which can build a database copy with a subset of the tablespaces using database or tablespace backup images. • Plan and execute the TRANSPORT option of RESTORE to copy schemas of objects between two Db2 databases. • Create incremental database or tablespace level backups to reduce backup processing and backup image storage requirements. • Implement automatic storage management for table spaces and storage groups or enable automatic resize options for DMS managed table spaces to reduce administration requirements and complexity. • Describe the various types of database memory including buffer pools, sort memory, lock memory and utility processing memory. • Adjust database or Db2 instance configuration options to improve application performance or processing efficiency. • Implement Db2 Self Tuning Memory management for specific database memory areas.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

Cel szkolenia

Please refer to course overview

Uczestnicy

This is an advanced course for DBAs and technical individuals who plan, implement, and maintain Db2 11.1 databases

Wymagania wstępne

- Perform basic database administration tasks for a Db2 database server, including using Db2 commands like BACKUP and RESTORE
- Utilize Structured Query Language (SQL) and be able to construct DDL, DML, and authorization statements
- These skills can be developed by taking:
    - CL207 Db2 11.1 Administration Workshop for Linux

Program szkolenia

• Advanced Monitoring• Db2 Table Space Management• Db2 Database Memory Management• Database rebuild support• Db2 database and tablespace relocation• Db2 Incremental Backup
