NSE5 - FortiClient EMS Training

CODE:	LENGTH:	PRICE:
FTN_FT-FCT	16 Hours (2 dage)	kr 15,742.10

Description

In this 1-day course, you will learn how to use the FortiClient feature and provision FortiClient using the FortiClient EMS. In interactive labs, you will explore the FortiClient installation and features. You will also explore EMS components, database management, operation modes, how to deploy FortiClient, and more. These administration fundamentals will provide you with a solid understanding of how to implement and manage endpoint security and the Security Fabric.

Who Should Attend

Networking and security professionals involved in the management, configuration, and administration of FortiClient endpoints used to secure their organizations' devices should attend this course.

Participants should have a thorough understanding of endpoint solutions.

Agenda

Introduction to FortiClient and FortiClient EMS
FortiClient Enterprise Management System (EMS)
FortiClient Deployment and Provisioning Using FortiClient EMS
Diagnostics and Troubleshooting
Objectives

After completing this course you should be able to:

- Identify when and why you need endpoint security
- Understand FortiClient installation
- Identify FortiClient features and settings
- Understand and configure FortiClient XML settings
- Understand the purpose of FortiClient EMS and identify FortiClient EMS components
- Understand FortiClient EMS administration and database management
- Provision and deploy FortiClient using FortiClient EMS
- Understand deployment methods and types
- Understand and configure endpoint policy and endpoint profiles
- Configure endpoint profile references
- Understand deployment packages and FortiClient installers
- Create and apply telemetry gateway lists
- Understand compliance verification rules and manage tags
- Diagnostic tools and troubleshooting of FortiClient and FortiClient EMS

System Requirements

If you take the online version of this class, you must use a computer that has the following:

- High-speed Internet connection
- Up-to-date web browser
- PDF viewer

- Speakers or headphones

One of the following:

- HTML 5 support or

- Up-to-date Java runtime environment (JRE) with Java plugin enabled in your web browser

You should use a Wired Ethernet connection, not a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.
