Red Hat Ceph Storage Architecture and Administration

CODE: **DURÉE:** **PRIX H.T.:**

REH_CEPH125 40 Hours (5 Jours) €2,800.00

Description

Red Hat® Ceph Storage Architecture and Administration (CEPH125) is part of the Emerging Technology series of courses from Red Hat Training. This five-day course is designed for storage administrators or cloud operators who want to deploy Red Hat Ceph Storage in their production environment as well as their OpenStack® environment.

Objectifs

Red Hat Ceph Storage Architecture and Administration (CEPH125) is structured around 3 segments. The first segment is an in-depth view of the Red Hat Ceph Storage architecture and provides instructions for deploying Red Hat Ceph Storage, including the Ceph Storage Cluster, the Ceph Object Gateway, and the Ceph Block Device. The second segment focuses on day-to-day operations of a Ceph Storage cluster together with some common troubleshooting and tuning techniques that storage administrators can use to provide 24x7 availability of the storage infrastructure. The third segment covers the integration of the Ceph Storage Cluster with Glance and Cinder in Red Hat Enterprise Linux® OpenStack Platform. This segment also covers configuring Red Hat Ceph Storage as a replacement for Swift and integrating it with Keystone.

Programme

- Deploying Red Hat Ceph Storage
- Creating a Ceph Block Device client
- Deploying the Red Hat Ceph Storage Gateway objects
- Troubleshooting Red Hat Ceph Storage
- Red Hat Ceph Storage operations and tuning
- Integrating Red Hat Ceph Storage with Glance
- Integrating Red Hat Ceph Storage with Cinder
- Integrating Red Hat Ceph Storage with Keystone
