ONTAP Security and Compliance Solutions Administration

CODE:	LENGTH:	PRICE:
NEP_OCSA	16 Hours (2 days)	€1,900.00

Description

In this course, you learn how to administer NetApp® ONTAP® 9 data management software-integrated security and compliance features. You learn how to create a secure IT environment according to Zero Trust principals such as "least privilege access" and "encrypt everything." You also administer, configure, and manage the integrated data security and compliance features in ONTAP 9, which include data retention with SnapLock software and data integrity with autonomous ransomware protection.

Objectives

• Secure an ONTAP based storage system according to Zero Trust principles
• Apply least privilege access control to ONTAP administrators and users
• Secure data in flight
• Secure data at rest
• Enforce compliance with data privacy and retention regulations
• Secure access to data by NAS protocols
• Protect data from corruption by ransomware or malware

Audience

NetApp Customers, Partners and Employees

Prerequisites

The 3 day course below is required.. **OT-CLU-A - ONTAP Cluster Administration**

Programme

• Security threats
• Security standards and regulations
• Security defenses
Module 1: Security concepts • Zero Trust   Using the Active IQ Unified Manager security dashboard
• ONTAP authentication
• Role-based access control
Module 2: NetApp ONTAP management security • Multifactor authentication
Applying least privilege access control and Configuring MAV   **Module 3: NetApp ONTAP network security**
• NAS network security
• Securing data in flight
• LIFs
• SAN security
• iSCSI security
• NVMe security   Segregating network traffic & Securing data in flight   **Module 4: NetApp ONTAP storage security**
• Encrypting data at rest
• NSE
• NVE
• Key management   Encrypting a volume & deleting data securely   **Module 5: NetApp ONTAP data retention**

• SnapLock compliance software
• Managing SnapLock volumes
• Protecting SnapLock volumes
• Advanced SnapLock features   Configuring SnapLock compliance software for file retention & using the privileged delete feature
                                    • NFS user authentication
                                    • NFS user authorization
                                    • NFS permissions
                                    • Securing in-flight SMB data
                                    • SMB user authentication
                                    • SMB user authorization
                                    • Active Directory features
                                    • Storage-Level Access Guard
                                    • User name-mapping

Module 6: NetApp ONTAP NAS security • Auditing and logging

Managing access to NAS shares & configuring Storage-Level Access Guard   **Module 7: Protecting NAS data integrity**

• NAS data integrity
• Malware and antivirus protection
• FPolicy
• ONTAP anti-ransomware
• Cloud Secure

Blocking the storage of unwanted data, creating frequent recovery points, enabling anti-ransomware protection and recovering from a ransomware attack

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
19 Aug 2024	Virtual Classroom (CET / UTC+1)	CEDT	English	Classroom		€1,900.00
07 Oct 2024	Virtual Classroom (CET / UTC+1)	CEDT	English	Classroom		€1,900.00
09 Dec 2024	Virtual Classroom (CET / UTC+1)	CET	English	Classroom		€1,900.00

Additional Information

This training is also available as onsite training. Please contact us to find out more.
