Learn the Basics of Machine Learning with IBM Watson Studio

CÓDIGO:	DURACIÓN:	Precio:
W7L160G	6 Hours (0.75 días)	€500.00

Description

This course introduces a case study, data set, machine learning concepts, and developing a machine learning model with Watson Studio.

Initially, you will be introduced to the case study and the challenges company facing, and the company data set. Next, you will be introduced to supervised, unsupervised learning, deep and reinforcement learning algorithms. Finally, you will develop a supervised machine learning model IBM Watson Studio with the dataset provided using Python.

Objetivos

- Describe the use case and the data set
- Distinguish between supervised and unsupervised machine learning
- Define deep learning and reinforcement learning
- Demonstrate the basic functions of Watson Studio for machine learning

Público

AI Specialists who want to learn machine learning algorithms

Requisitos Previos

- Some experience in Python
- Some experience in Jupyter notebook
- Some experience in Watson Studio or completion of [Watson Studio Primer](#)
- A Watson Studio Lite plan

Programa

- Introduction to the case study and the data set
- Introduction to Machine Learning
- Developing the model

Fechas Programadas

A petición. Gracias por [contactarnos](#).

Información Adicional

Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.
