Fast Path to Informix for Experienced Relational Database Administrators - SPVC

CÓDIGO:	DURACIÓN:	Precio:
2X480G	32 Hours	€950.00

Description

In this course, you will use their experience with other relational database management systems as a basis for learning how to administer the Informix database server. You will learn the terminologies used to describe Informix database server objects and processes. They will learn how to configure and start an Informix database server instance, and perform tasks related to the monitoring and maintenance of the instance. You will also learn the terminology and tasks required to design and maintain Informix databases and queries.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

Objetivos

- Configure and initialize an Informix database instance
- Add and remove spaces and chunks
- Manage the operating mode of the database server
- Monitor server activity
- Create and alter database objects
- Explain locking granularity
- Explain Informix isolation levels
- Use SET EXPLAIN to obtain a query plan
- Use UPDATE STATISTICS to better define data distribution
- Create simple stored procedures and triggers

Público

This intermediate course is for database and system administrators.

Requisitos Previos

You should have:

- Experience with administration of other relational database management systems
- Experience with UNIX/Linux operating systems

Programa

Please refer to Course Overview for description overview.
