JUN_AJEX 16 Hours (2 days) £1,495.00

Description

This two-day course is designed to provide detailed coverage of VLAN operations, Multiple Spanning Tree Protocol (MSTP) and VLAN Spanning Tree Protocol (VSTP), authentication and access control for Layer 2 networks, IP telephony features, class of service (CoS) and monitoring and troubleshooting tools and features supported on the EX Series Ethernet Switches. Through demonstrations and hands-on labs, students will gain experience in configuring and monitoring the Junos operating system (OS) and in monitoring device and protocol operations.

This course uses Juniper Networks EX 4300 Series Ethernet switches for the hands-on component, but the lab environment does not preclude the course from being applicable to other Juniper hardware platforms running the Junos OS.

This course is based on Junos OS Release 21.4R1.12. Course Level

Advanced Junos Enterprise Switching (AJEX) is an advanced-level course.

Objectives

- Restrict traffic flow within a VLAN. • Manage dynamic VLAN registration. • Tunnel Layer 2 traffic through Ethernet networks.
- Review the purpose and operations of a spanning tree. • Implement multiple spanning-tree instances in a network.
- Implement one or more spanning-tree instances for a VLAN. • List the benefits of implementing end-user authentication.
- Explain the operations of various access control features. • Configure and monitor various access control features.
- Describe processing considerations when multiple authentication and access control features are enabled.
- Describe some common IP telephony deployment scenarios. • Describe features that facilitate IP telephony deployments.
- Configure and monitor features used in IP telephony deployments. • Explain the purpose and basic operations of CoS.
- Describe CoS features used in Layer 2 networks. • Configure and monitor CoS in a Layer 2 network.
- Describe a basic troubleshooting method. • List common issues that disrupt network operations.
- Identify tools used in network troubleshooting. • Use available tools to resolve network issues.

Audience

Individuals responsible for configuring and monitoring EX Series switches using Junos Enhanced Layer 2 Software (ELS).
Relevant Juniper Product • EX Series • QFX Series

Prerequisites

- Basic networking knowledge and an understanding of the OSI reference model and the TCP/IP protocol suite
- Completion of the Introduction to the Junos Operating System (IJOS) course, or equivalent knowledge
- Completion of Junos Enterprise Switching (JEX) course, or equivalent knowledge

Programme

Day 1 Course Introduction VLAN Traffic Management • Assign user traffic to VLANs

- Explain how to restrict traffic flows within a VLAN Advanced Ethernet Switching
- Configure dynamic VLAN registration using MVRP • Implement Layer 2 tunnel traffic through Ethernet networks

Lab 1: Advanced Ethernet Switching MSTP • Describe a spanning tree's purpose and operations

- Implement multiple spanning tree instances in a network • Overview of Authentication Processing VSTP
- Describe spanning tree instances for a VLAN • Implement spanning tree instances for a VLAN Lab 2: Advanced Spanning Tree Authentication and Access Control • List the benefits of implementing end-user authentication

- Describe the operations of 802.1X access control features Access Control Features—MAC RADIUS and Captive Portal
- Configure and monitor MAC radius access control features • Configure and monitor captive portal access control features
- Describe processing considerations when multiple authentication and access control features are enabled

Lab 3: Authentication and Access Control Day 2 IP Telephony Features—Power over Ethernet, Neighbor Discovery using LLDP

- Describe some common IP telephony deployment scenarios • Explain power over Ethernet feature of IP telephony

- Describe neighbor discovery feature of IP telephony IP Telephony Features—Voice LAN
- Describe voice VLAN feature of IP telephony • Implement the IP telephony features Lab 4: Deploying IP Telephony Features Class of Service Overview • Configure and monitor class of service in a Layer 2 network • Perform class of service troubleshooting Implement Class of Service • Configure and monitor class of service in a Layer 2 network • Perform class of service troubleshooting Lab 5: Class of Service Introduction to Monitoring and Troubleshooting Layer 2 Enterprise Networks
- Explain basic troubleshooting flow • Evaluate troubleshooting steps Implement Monitoring and Troubleshooting Layer 2 Enterprise Networks • List common issues that disrupt network operations
- Identify tools used in network troubleshooting • Use available tools to resolve network issues Lab 6: Monitoring and Troubleshooting Appendix A: Junos Space Network Director • Describe Junos Space Network Director
- Configure Junos Space Network Director Appendix B: Introduction to Mist AI Integration
- List the wired assurance options and the supported Juniper switching devices • Describe provisioning and deployment process Appendix C: Mist Wired Assurance • Describe the deployment options • Explain wired assurance SLE and their classifiers
- Describe the role of Mist within campus and branch architecture Appendix D: ELS and Non-ELS Configuration Examples
- Configure switch options • Describe IRB and VLAN Interfaces • Describe Q-in-Q Tagging

Follow on courses

Recommended Next Course: JNCIE-ENT Certification Self-Study Bundle

Test and Certification

JNCIP-ENT exam topics are based on the content of the recommended instructor-led training courses, as well as the additional resources.

- Exam code: JN0-649
- Written exam
- Administered by Pearson VUE
- Exam length: 120 minutes
- Exam type: 65 multiple-choice questions
- Pass/fail status is available immediately
- Junos OS 21.2

The JNCIP-ENT certification is valid for three years. Exams can be purchased and scheduled at <https://home.pearsonvue.com/junipernetworks/>

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
30 May 2024	Virtual Classroom	BST	English	Instructor Led Online		£1,495.00 £1,270.75
16 Sep 2024	Virtual Classroom	BST	English	Instructor Led Online		£1,495.00
09 Dec 2024	Virtual Classroom	GMT	English	Instructor Led Online		£1,495.00

Additional Information

This training is also available as onsite training. Please contact us to find out more.
