VMware vRealize Operations for Operators [V8.6]

CÓDIGO:	DURACIÓN:	Precio:
VMW_VROPSOP86	16 Hours (2 días)	€750.00

Description

This two-day course is for users who are responsible for day-to-day management of VMware vRealize® Operations™. This course explains policies, capacity concepts, and workload optimization with real-world use cases. This course covers application monitoring, troubleshooting using workbench, alerts, predefined dashboards, and explains how to manage compliance and configurations.

Note: If you have taken the VMware vRealize Operations: Install, Configure, Manage course, duplicate content makes this course unsuitable for you.

This course is also available in an On Demand format. For more information, select this link: VMware vRealize Operations for Operators [V8.6] - On Demand.

Product Alignment

- VMware vSphere® 7.0.3
- VMware vRealize® Operations Manager™ 8.6

Objetivos

By the end of the course, you should be able to meet the following objectives:

- List the vRealize Operations use cases
- · Identify features and benefits of vRealize Operations
- · Use interface features to assess and troubleshoot operational problems
- Create policies to meet the operational needs of your environment
- · Recognize effective ways to optimize performance, capacity, and cost in data centers
- · Troubleshoot and manage problems using workbench, alerts, and predefined dashboards
- Manage configurations Configure application monitoring using VMware vRealize® Operations Cloud Appliance™
- Monitor the health of the vRealize Operations cluster
- Perform cluster management tasks

Público

vRealize Operations on-premises customers including operators and system administrators.

Requisitos Previos

Before taking this course, you must complete at least one of the following:

- VMware vSphere: Install, Configure, Manage [V7]
- 6 months hands-on vRealize Operations experience

Programa

1 Course Introduction

2 Introduction to vRealize Operations

Introductions and course logistics
List the vRealize Operations use cases

- Course objectives

3 vRealize Operations Concepts

Identify the product UI components

- · Create and use tags to group objects
- Access the vRealize Operations User Interface (UI) Use a custom group to group objects

4 vRealize Operations Policies

- Create policies for the various workloads
- Explain how policy inheritance works

5 Capacity Optimization

- Define the capacity planning terms
- Explain the capacity planning models
- Assess the overall capacity of a data center and identify the optimization recommendations

6 Costing in vRealize Operations

- Discuss about the cost drivers in vRealize Operations
- Assess the cost of your data center inventory

7 Performance Optimization

- · Introduction to performance optimization
- Define the business and operational intentions for a data center
- Automate the process of optimizing and balancing workloads in data centers
- Report the results of the optimization potential

8 Troubleshooting and Managing Configuration

- Describe the troubleshooting workbench
- Recognize how to troubleshoot problems by monitoring alerts
- Use step-by-step workflows to troubleshoot the vSphere objects
- Assess your environment's compliance to standards
- · View the configurations of the vSphere objects in your environment

9 Operating System and Application Monitoring

- · Describe the native service discovery and application monitoring features
- Configure the application monitoring
- Monitor the operating systems and applications
- 10 Managing a vRealize Operations Deployment
- Monitor the health of a vRealize Operations cluster
- Generate a support bundle
- View the vRealize Operations log files and audit reports
- Perform the vRealize Operations cluster management tasks

Fechas Programadas
