# ONTAP Cluster Fundamentals

<b>CÓDIGO:</b>	<b>DURACIÓN:</b>	<b>Precio:</b>
NEP_OT-CF	8 Hours (1 dia)	€950.00

## Description

In this course, you learn the features and benefits of NetApp® ONTAP® 9 data management software. The course enables you to explain the architecture and functionality of an ONTAP cluster. You also learn the basics of how to administer, configure, and manage an ONTAP cluster using the command line interface, System Manager and NetApp BlueXP.

## Objetivos

- Outline the components of a cluster and its features
- Discuss how to manage cluster setup, storage provisioning, and data protection
- Identify the networks, ports, IPspaces, broadcast domains, and network interfaces that the clusters use
- Discuss storage VMs (storage virtual machines, also known as SVMs) and how FlexVol volumes provide flexibility in managing data
- Use tools and features that are used to identify and resolve cluster issues

## Público

NetApp Employees, Partners & Clients with the following job roles..

- Administrator
- Architect
- Operator
- Engineer

## Requisitos Previos

No course pre-requisites

## Programa

**Module 1 - Overview** • Describe the enterprise storage essential concepts

- Explain the value NetApp brings to storage architectures with NetApp ONTAP
  - Introduce NetApp BlueXP as the interface for ONTAP-powered evolved cloud
- Module 2 - Architecture**
- Review key ONTAP terms • Examine ONTAP architecture • Explain the types of ONTAP cluster configuration
- Exercises**
- Exploring ONTAP Architecture using the command line interface
- Module 3 - Management** • Describe the Administrative roles
- Review the Administrative interfaces • Examine proactive monitoring and management interfaces
- Exercises**
- Exploring ONTAP UIs
- Module 4 - ONTAP Networks** • Describe the storage networks that supports an ONTAP cluster
- Explain the types of interfaces used in storage networks • Examine how ONTAP support multitenancy in data networks
  - Illustrate how logical interfaces provide data access
- Exercises** - Managing Network Resources

**Module 5 - Storage Virtual Machines** • Describe a storage virtual machine

- Explain how volumes are used by SVMs to manage data
  - Illustrate how storage efficiencies provide value to storage administrators • Examine how to create and configure an SVM
  - List data protection techniques available to protect an SVM's data
- Exercises** Introducing Storage Virtual Machines

**Module 6 - Maintenance** • Describe the types of nondisruptive upgrades and maintaining current firmware

- Examine cluster performance concepts • Explain techniques for proactively monitoring and management an ONTAP cluster

## Fechas Programadas

Fecha	Localización	Zona horaria	Idioma	Modalidad de impartición	Impartición garantizada	Precio
23 Oct 2023	Virtual Classroom	CEDT	Spanish	Classroom		€950.00
15 Jan 2024	Virtual Classroom	CET	Spanish	Classroom		€950.00
15 Apr 2024	Virtual Classroom	CEDT	Spanish	Classroom		€950.00
08 Jul 2024	Virtual Classroom	CEDT	Spanish	Classroom		€950.00
19 Aug 2024	Virtual Classroom	CEDT	Spanish	Classroom		€950.00
07 Oct 2024	Virtual Classroom	CEDT	Spanish	Classroom		€950.00
09 Dec 2024	Virtual Classroom	CET	Spanish	Classroom		€950.00

## Información Adicional
