IBM Safer Payments: Hands-on Case Management Training (v6.4.x)

CODE:	LENGTH:	PRICE:
6A442G	16 Hours (2 days)	£1,300.00

Description

IBM Safer Payments is an innovative real-time payment fraud prevention and detection solution for all cashless payment types. IBM Safer Payments provides not only model capabilities based on inbuilt tools, but also the option to import externally built fraud models for real-time decisioning.

In this course, IBM Safer Payments' case management capabilities are presented in detail. Students will learn how to configure and customize the built-in case management, and the workflow and activities involved when investigating cases.

Objectives

In this course, students will learn about the following:

- Mandator structure
- Queries
- Case management concept
- Workflows
- Case configuration
- Working queues
- Case investigation
- Fraud marking
- Risk lists
- Case actions and external queries
- Reporting

Audience

- External: Fraud Analysts and Investigators, Application and System Admins managing Safer Payments (Optional)
- Internal: IBM Lab Services, IBM Support, IBM Technical Pre-Sales and IBM Business Partners

Prerequisites

- Must be familiar with Unix command line navigation and configuration actions
- Some familiarity with statistical models
- Knowledge in Fraud Prevention for cashless payments

Programme
