IBM Tivoli Storage Manager 6.3 Implementation and Administration

CODE:	LENGTH:	PRICE:
ZL1_TS612	5 day(s)	Ft682,000.00

Description

This course is the first of two five-day instructor-led courses for implementing, configuring and administering IBM Tivoli Storage Manager. In hands-on practice, you install the Tivoli Storage Manager 6.3 server, backup-archive client, the Tivoli Integrated Portal, and Administration Center. After the product is installed, you configure the environment. You create and configure storage pool hierarchies and define policies to manage the flow of data from disk to disk or tape media. Lab exercises guide you through the steps to back up, restore, archive and retrieve client data. You also create schedules to run administrative and client processes and maintain your Tivoli Storage Manager environment to ensure recoverability. The Student Exercises are available for Windows and AIX (see course TSX12G). The lecture material covers all supported Intel and UNIX platforms. Students who need advanced administration skills should also take course *IBM Tivoli Storage Manager 6.3 Advanced Administration, Tuning, and Troubleshooting (TS622)*

Objectives

- Discuss the features of IBM Tivoli Storage Manager
- Install IBM Tivoli Storage Manager server, backup-archive client, and Administration Center
- Navigate the administrative interfaces
- Create and manage storage pools and storage pool volumes
- Explain the concepts of attaching a tape library and preparing media
- Describe data deduplication
- Define policy to meet business requirements
- Manage the IBM Tivoli Storage Manager database and recovery log
- Configure the backup-archive client
- Back up, restore, archive, and retrieve client data
- Protect the IBM Tivoli Storage Manager database and storage pools
- Schedule administrative tasks
- Monitor server and client messages and events

Audience

This basic course is for system administrators and implementers who will be responsible for implementing an IBM Tivoli Storage Manager 6.3 solution.

Prerequisites

You should have:

- Windows administration skills

Programme

- IBM Tivoli Storage Manager overview
- Installing IBM Tivoli Storage Manager
- Administrative interfaces and privileges
- Managing storage pools and storage pool volumes

- Storage media devices
- Policy management
- Customizing the Tivoli Storage Manager database and recovery log
- Client configuration
- Backup-archive client functions
- Protecting the database and storage pools
- Automating operations
- Monitoring and event logging
- Appendix A: Additional product information
- Appendix B: Problem determination

Further Information

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show: The current GTP list price
The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.
