Microsoft Azure Certification Bundle with Administering Relational Databases on Microsoft Azure

Kód:	DÉLKA:	CENA:
MCS_AZ9FDP300	40 Hours (5 DENNÍ)	Kč bez DPH 50,000.00

Description

Školení je vedeno virtuálně v anglickém jazyce ve školicím středisku Arrow v Anglii.

Cena školení je 1 795 GBP bez DPH - tato cena bude při fakturaci přepočtena aktuálním kurzem.

With this bundle, you get a quick introduction to Microsoft Azure as well as the necessary know-how to become a "Microsoft Certified: Azure Database Administrator Associate".

Benefit from two courses and pay for only one at 40% discount. **You will start with the 1-day fundamentals webinar:**

"AZ-900T00: Microsoft Azure Fundamentals"

This webinar provides foundational level knowledge on cloud concepts; core Azure services; and Azure management and governance features and tools.

After attending the fundamentals webinar your learning journey will continue with:

The official 4-days virtual classroom "DP-300T00: Administering Microsoft Azure SQL Solutions".

Please click the link below to review the schedule and outlines of this official Microsoft course.

[Administering Microsoft Azure SQL Solutions](#) **Opportunity to become certified:**

This bundle also includes an exam voucher worth £113, which you can use to take the exam to become a "Microsoft Certified: Azure Database Administrator Associate".

Please indicate your preferred date for the second course "DP-300T00: Administering Microsoft Azure SQL Solutions" in the comments field of the shopping cart for this bundle.

The following outlines and timetable represent the content as well as the planning of the one-day fundamental webinar.

Určeno pro

This course is suitable for IT personnel who are just beginning to work with Azure. This audience wants to learn about our offerings and get hands-on experience with the product. This course primarily uses the Azure portal and command line interface to create resources and does not require scripting skills. Students in this course will gain confidence to take other role-based courses and certifications, such as Azure Administrator. This course combines lecture, demonstrations, and hands-on labs. This course will also help prepare someone for the AZ-900 exam.

Vstupní znalosti

There are no prerequisites for taking this course. Familiarity with cloud computing is helpful, but isn't necessary.

Program

Module 1: Cloud Concepts

In this module, you'll take an entry level end-to-end look at cloud concepts, which will provide you with a solid foundation for completing the available modules for Azure Fundamentals.

Lessons

- Cloud Computing
- Cloud benefits
- Cloud service types

After completing this module, students will be able to:

- Describe cloud computing.
- Describe the benefits of using cloud services.
- Describe cloud service types.

Module 2: Azure Architecture and Services

This module explores Microsoft Azure, its architecture, and some of the most commonly used services and resources.

Lessons

- Core Azure architectural components
- Azure compute and networking services
- Azure storage services
- Azure identity, access, and security

Lab : Explore the Microsoft Learn sandbox

Lab : Create an Azure resource

Lab : Create an Azure virtual machine

Lab : Configure network access

Lab : Create a storage blob

After completing this module, students will be able to:

- Describe the core architectural components of Azure.
- Describe Azure compute and networking services.
- Describe Azure storage services.
- Describe Azure identity, access, and security.

Module 3: Core Solutions

In this module, you'll learn about the management and governance resources available to help you manage your cloud and on-premises resources.

Lessons

Cost management in Azure

Features and tools in Azure for governance and compliance

Feature and tools for managing and deploying Azure resources

Monitoring tools in Azure

Lab : Configure a resource lock

Lab : Compare workload costs using the Total Cost of Ownership calculator

Lab : Estimate workload costs using the Pricing calculator

After completing this module, students will be able to:

- Describe cost management in Azure.
- Describe features and tools in Azure for governance and compliance.
- Describe features and tools for managing and deploying Azure resources.
- Describe monitoring tools in Azure.
