IBM Planning Analytics: Analyze Data and Create Reports (V2.0.x)

Kod: **Czas trwania:** **Cena netto:**

J1357G 16 Hours zł4,950.00

Description

Contains PDF course guide, as well as a lab environment where students can work through demonstrations and exercises at their own pace.

This course is designed to teach analysts how to use IBM Planning Analytics to analyze data to discover trends and exceptions, create and customize reports and templates, and contribute data to plans. Through a series of lectures and hands-on activities, you will learn how use Planning Analytics Workspace and Planning Analytics for Microsoft Excel to create analyses, enter data, create custom views and dashboards, and build formatted reports and forms.

Cel szkolenia

Understanding IBM Planning Analytics data
Creating books
Creating and saving views
Changing the way data is displayed
Displaying specific members by using sets
Adding calculations to views
Highlighting exceptions by using conditional formatting
Entering data
Experimenting with data by using sandboxes
Working with spreadsheets online by using websheets
Formatting for reporting
Exploring data by using visualizations
Creating dashboards
Examining performance by using scorecards
Exporting data
Introduction to IBM Planning Analytics for Microsoft Excel
Exploring data in Planning Analytics for Microsoft Excel
Create reports easily by using Quick Reports
Expanding and formatting members by using Dynamic Reports
Exploring TM1 functions
Creating Custom Reports
Entering Data in Planning Analytics for Microsoft Excel
Simplify tasks by using action buttons
Creating websheets

Uczestnicy

Analysts

Wymagania wstępne

- Knowledge of your business requirements
- Basic knowledge of Microsoft Excel

Program szkolenia

Understanding IBM Planning Analytics data
Understanding models
Understanding cubes
Understanding dimensions
Understanding views
Understanding sets
Creating books
Creating books
Adding content
Creating new sheets
Saving, closing, and opening views
Creating and saving views
Compare two views of the same cube
Create new views
Save a view
Changing the way data is displayed
Move and filter dimensions
Show different levels of detail
Create an asymmetric view
Display cells as percentages
Add top or bottom filters
Show attributes for dimension members
Displaying specific members by using sets
Display existing sets
Add, remove, and reorganize members in a set
Find members by using searches and filters
View attributes
Save sets
Edit a set
Adding calculations to views
Add summary calculations
Add member calculations
Remove and rename calculations
Highlighting exceptions by using conditional formatting
Apply conditional formatting
Add an additional condition
Entering data
Distribute data to multiple cells by using data spreading
Enter and hold data using quick commands
Copy and paste and use calculations
Add a comment to a cell
Experimenting with data by using sandboxes
Creating sandboxes
Comparing sandboxes
Committing data and deleting sandboxes
Working with spreadsheets online by using websheets
Find and add websheets to your book
Explore websheets
Formatting for reporting
Creating a new view
Formatting the view for reporting
Exploring data by using visualizations
Examine different visualizations
Customize a visualization

Creating dashboards Adding and reusing objects Synchronizing objects Navigating the book and perform tasks by using buttons
Changing the appearance of a view Hiding information Proven Practices for Dashboards
Examining performance by using scorecards Reading scorecards Adding scorecards to a book
Exporting data Exporting a view to Microsoft Excel Introduction to IBM Planning Analytics for Microsoft Excel Examining report types
Exploring data in Planning Analytics for Microsoft Excel Connect to a system, and add an Exploration Display different dimension
members Modify and save the view
Create reports easily by using Quick Reports Convert an Exploration to a Quick Report Drag a view to add a Quick Report
Synchronize reports by using cell referencing Change members on rows or columns Add columns or rows and apply styles Apply
custom formatting
Expanding and formatting members by using Dynamic Reports Create and explore a Dynamic Report Formatting the Dynamic
Report Rebuild the Dynamic Report
Exploring TM1 functions Examine the TM1 functions in a Dynamic Report Derive rows based on saved sets Derive rows based on
MDX Create custom format definitions Create custom columns Add new sections and multiple Dynamic Reports to a single sheet
Creating Custom Reports Create two custom reports Combine the two reports
Entering Data in Planning Analytics for Microsoft Excel Entering data in cube viewer Entering data in Dynamic Reports Entering
data in Explorations and Quick Reports Using Sandboxes to experiment with data
Simplify tasks by using action buttons Enable action buttons Add an action button to navigate to another worksheet Edit an action
button Create an action button that rebuilds a worksheet
Creating worksheets Publish a worksheet Manage worksheets Add the worksheet to a Planning Analytics Workspace book
