Description

This two-day course is designed to provide students with MPLS-based Layer 2 virtual private network (VPN) knowledge and configuration examples.

The course includes an overview of MPLS Layer 2 VPN concepts, such as BGP Layer 2 VPNs, LDP Layer 2 circuits, FEC 129 BGP autodiscovery, virtual private LAN service (VPLS), Ethernet VPN (EVPN), and Inter-AS Layer 2 VPNs.

These concepts are put into practice with a series of in-depth hands-on labs, which will allow participants to gain experience in configuring and monitoring Layer 2 VPNs, VPLS, and EVPNs on Junos OS devices utilizing the Junos OS Release 16.2R1.6.

- Routing
- Switching
- Junos OS
- M Series
- MX Series
- PTX Series

Junos Layer 2 VPNs (JL2V) is an advanced-level course. Relevant Juniper Product • Service Provider Routing and Switching Track

Objectives

- Define the term virtual private network.
- Describe the business drivers for MPLS VPNs.
- Describe the differences between Layer 2 VPNs and Layer 3 VPNs.
- List advantages for the use of MPLS Layer 3 VPNs and Layer 2 VPNs.
- Describe the roles of a CE device, PE router, and P router in a BGP Layer 2 VPN.
- Explain the flow of control traffic and data traffic for a BGP Layer 2 VPN.
- Configure a BGP Layer 2 VPN and describe the benefits and requirements of over-provisioning.
- Monitor and troubleshoot a BGP Layer 2 VPN.
- Explain the BGP Layer 2 VPN scaling mechanisms and route reflection.
- Describe the Junos OS BGP Layer 2 VPN CoS support.
- Describe the flow of control and data traffic for an LDP Layer 2 circuit.
- Configure an LDP Layer 2 circuit.
- Monitor and troubleshoot an LDP Layer 2 circuit.
- Describe the operation of FEC 129 BGP autodiscovery for Layer 2 VPNs.
- Configure a FEC 129 BGP autodiscovery Layer 2 VPN.
- Monitor and troubleshoot a FEC 129 BGP autodiscovery for Layer 2 VPNs.
- Describe the difference between Layer 2 MPLS VPNs and VPLS.
- Explain the purpose of the PE device, the CE device, and the P device.
- Explain the provisioning of CE and PE routers.
- Describe the signaling process of VPLS.
- Describe the learning and forwarding process of VPLS.
- Describe the potential loops in a VPLS environment.
- Configure BGP, LDP, and FEC 129 BGP autodiscovery VPLS.
- Troubleshoot VPLS.
- Describe the purpose and features of Ethernet VPN.
- Configure Ethernet VPN.
- Monitor and troubleshoot Ethernet VPN.
- Describe the Junos OS support for hierarchical VPN models.
- Describe the Junos OS support for Carrier-of-Carriers VPN Option C.
- Configure the interprovider VPN Option C.
- Describe the Junos OS support for multisegment pseudowire for FEC 129.
- Describe and configure circuit cross-connect (CCC).

Audience

This course benefits individuals responsible for configuring and monitoring devices running the Junos OS.

Prerequisites

Students should have intermediate-level networking knowledge and an understanding of OSPF, IS-IS, BGP, and Junos policy. Students should have experience configuring MPLS label-switched paths using Junos. Students should also attend Introduction to the Junos Operating System (IJOS), Junos Service Provider Switching (JSPX), Junos Intermediate Routing (JIR) and Junos MPLS Fundamentals (JMF) courses prior to attending this class.

Programme

		BGP Layer 2 VPNs
		• Overview of Layer 2 Provider Provisioned VPNs
		• BGP Layer 2 VPN Operational Model: Control Plane
		• BGP Layer 2 VPN Operational Model: Data Plane
		• Preliminary BGP Layer 2 VPN Configuration
		• BGP Layer 2 Configuration
		• Monitoring and Troubleshooting BGP Layer 2 VPNs
		LAB: BGP Layer 2 VPNs
		Layer 2 VPN Scaling and CoS
		• Review of VPN Scaling Mechanisms
		• Layer 2 VPNs and CoS
	MPLS VPNs	
	• MPLS VPNs	
Day 1 Course Introduction	• Provider-Provisioned VPNs	LAB: Layer 2 VPN Scaling
LDP Layer 2 Circuits		
• LDP Layer 2 Circuit Operation		
• LDP Layer 2 Circuit Configuration		
• LDP Layer 2 Circuit Monitoring and Troubleshooting		
• FEC 129 BGP Autodiscovery Layer 2 Circuit Operation		Virtual Private LAN Services
• FEC 129 BGP Autodiscovery Layer 2 Circuit Configuration		• Layer 2 MPLS VPNs Versus VPLS
• FEC 129 BGP Autodiscovery Monitoring and Troubleshooting		• BGP VPLS Control Plane
		• BGP VPLS Data Plane
		• Learning and Forwarding Process
LAB: LDP Layer 2 Circuit and FEC 129 BGP Autodiscovery		Day 2 • Loops
	Ethernet VPN (EVPN)	
	• EVPN Overview	
	• EVPN Control Plane	
VPLS Configuration	• EVPN Operation	
• VPLS Configuration	• EVPN Configuration	
• VPLS Troubleshooting	• EVPN Troubleshooting	

Lab: VPLS

Lab: EVPN

Please note that the following Appendices are not covered as standard during the training course unless requested by the customer, and agreed with Arrow, upon booking:

- Hierarchical VPN Models
- Carrier-of-Carriers VPN Option C
- Interprovider VPN Option C
- Multisegment Pseudowires

LAB: Interprovider L2VPNs

Appendix B: Circuit Cross-Connect

Appendix A: Interprovider Backbones for Layer 2 VPNs • Circuit Cross-Connect

Follow on courses

- Advanced Junos Service Provider Routing (AJSPR)
- Junos Layer 3 VPN (JL3V)
- Junos Class of Service (JCOS)
- Junos Multicast Routing (JMR)
