# Symantec Endpoint Security Complete Administration R1.2

CODE: LENGTH: PRICE:

SYM 000218 40 Hours (5 days) kr43,750.00

#### **Description**

The Symantec Endpoint Security Complete Administration R1.2 course is designed for the network, IT security, and systems administration professional in a Security Operations position tasked with the day-to-day operation of a SESC endpoint security environment. The course focuses on SES Complete cloud-based management using the ICDm management console.

#### **Objectives**

By the completion of this course, you will be able to:

- Describe the benefits of using a multi-layered cloud-based environment for endpoint security.
- Secure endpoints against network, file based, and emerging threats.
- · Control endpoint integrity and compliance.
- Respond to security threats using SESC monitoring and reporting.
- Enforce adaptive security compliance.
- Protect Active Directory
- Use SESC in a Hybrid Environment / Migrate to the Cloud

#### **Prerequisites**

This course assumes that students have a basic understanding of advanced computer terminology, an administrator-level knowledge of Microsoft Windows operating systems, and have viewed the "Symantec Endpoint Security Complete - Getting Started" eLearning content prior to attending this course.

#### **Programme**

Module 1: Introduction to Endpoint Security Complete

- Introduction
- SES Complete Architecture
- SES Complete Cloud-Based Management
- SES Complete in a Hybrid Environment
- Managing Devices and Policies with ICDm
- SES Complete Client Deployment

#### Module 2: Configuring SES Complete Security Controls

- Policy Overview
- Threat Overview and the MITRE ATT&CK Framework
- · Preventing Initial Access
- Preventing Execution
- Preventing Persistence
- Preventing Privilege Escalation
- Preventing Defense Evasion
- · Preventing Discovery
- Blocking Command & Control
- Blocking Exfiltration
- Blocking the Impact Phase
- Managing Content Updates
- · Policy Versioning and History

#### Module 3: Responding to Threats with ICDm

- The ICDm Home Page
- · Searching SES Data
- Using SES Reports
- Managing Mitigation
- · Acting on Events

#### Module 4: Endpoint Detection and Response

- Enabling Endpoint Detection and Response
- Understanding Suspicious & Malicious Activity
- Investigating Threats
- · Capturing Endpoint Data
- LiveShell
- Retrieving and Submitting Files for Analysis
- · Quarantining Devices
- · Blocking and Quarantining Files

#### Module 5: Attack Surface Reduction

- Reduce the Attack Surface with Adaptive Protection
- Reduce the Attack Surface with Application Control

- Reduce the Attack Surface with Custom Application Behavior
- Reduce the Attack Surface with Host Integrity

#### Module 6: Mobile and Modern Device Security

- Definition of Modern and Mobile Devices
- · Modern and Mobile Threats
- Introducing Network Integrity
- Network Integrity Policy Configuration
- Network Integrity for Windows 10 Modern Devices
- Network Integrity for Mobile Devices
- · Exploring Generated Alerts

#### Module 7: Threat Defense for Active Directory

- Active Directory Security Challenges
- Introducing Threat Defense for Active Directory
- Configuration
- Threat Scenarios and Remediation

#### Module 8: Working with a Hybrid Environment

- · Reasons for Choosing a Hybrid Environment
- · SES Hybrid Architecture
- SEPM Enrollment Process in ICDm
- Policies and Device Management from the Cloud
- · Migrating to the Cloud

#### **Test and Certification**

250-561 ENU: Symantec Endpoint Security Complete Administration R1
